

ISOPE-2016 Rhodes
2016 Asset Integrity Symposium
Final CALL FOR PAPERS

At
The 26th International Offshore and Polar Engineering Conference – ISOPE-2016
Rhodes (Rodos), Greece, June 26 – July 2, 2016

The third symposium on Asset Integrity will be held at the annual ISOPE-2016 Conference, Rhodes. Attention to O&G pipelines and structures has never been more intense, as their criticality to infrastructure and the incidence of failure due to aging, corrosion and other factors have increased. The challenges and costs of asset integrity evaluation and repair are expected to grow in the future as developments move into more challenging deeper water and arctic environments. The purpose of this symposium is to discuss the challenges and share the state-of-the-art knowledge in surveillance and integrity management. This symposium will cover all aspects of science, technology, and applications related to monitoring, inspection, rehabilitation and leak detection methodologies.

The organizing committee cordially invites scientists and engineers from academia, industry, and regulatory authorities to share their latest advancements.

Special ISOPE room rate at top 5 star hotel starts from €94 /night.

Suggested Technical Topics

Safety by Design

Best practices for life cycle evaluations

Advances in inspection & monitoring

Best practices for operations, monitoring and maintenance

Risk assessment and remaining life prediction

Repair and rehabilitation

Focus Sessions

- *Integrity Management*
- *Marine & Structural Integrity*
- *Pipeline & Riser Integrity*
- *Corrosion Management*
- *Facility life extension*
