Shinich Takagawa ............................................................. 18

OCEAN TECHNOLOGY

Terra Nova Design Challenges and Operational Integrity Strategy
Ahmed Ewida, Greg Lever and Sherry Power ................................................................. 24

Accident with P-36 Platform The Emergency Drainage Tank Rupture
C. Cyranka, P.M. Videiro, G.C. Nunes and A.P. Melo ............................................................. 32

Comparative Assessment of Design Based Revised API Bulletin 2U and Other Recommendations
Cuneyt C. Capanoglu and Stephen W. Balint ................................................................. 39

Comparison of Model Test Results and Analytical Motion Analyses for a Buoyant Leg Structure
C.C. Capanoglu, C.B. Shaver and H. Hirayama, K. Sao ............................................................. 46

Experience-Based Assessment of Field Development Options and Costs
Hiroaki Hirayama, Kunihisa Sao and Cuneyt C. Capanoglu ............................................................. 54
OFFSHORE SYSTEMS AND ENGINEERING

Damage Detection and Safety Assessment of Structures Operating in Vietnam Continental Shelf  
Nguyen Tien Khiem, Do Son and Nguyen Van Thu ................................................................. 62

The Vibration Properties of Jacket Platform Embedded in Layered Soil  
Wang Teng and Huajun Li ......................................................................................................... 69

Computational Tools For The Reassessment Of Fixed Offshore Platforms  
Paulo Fernando Neves Rodrigues and Breno Pinheiro Jacob .................................................. 74

Full-life Cycle Optimization Model of the Offshore Jacket Platform  
Song Yu-pu and Wang Li-cheng ................................................................................................. 82

Optimal Vibration Control Strategy for Offshore Platforms  
Chunyan Ji, Huajun Li and Shuqing Wang ................................................................................ 91

Influence of Cone Angles on Both Tangential and Axial Velocity Distributions in Hydrocyclones  
Lixin Zhao, Minghu Jiang and Zunce Wang .............................................................................. 97

Effects of Geometric and Operating Parameters on Pressure Drop and Oil-Water Separation Performance for Hydrocyclones  
Minghu Jiang, Lixin Zhao and Zunce Wang .............................................................................. 102

FPSO, VLFS AND SPAR

Assessment of the Effectiveness of the Bilge Keel as an Anti-Roll Device in VLCC-Sized FPSOs  
Jose Alfredo Ferrari Jr. and Marcos Donato A. Ferreira ................................................................. 107

A Design of Bilge Keels for Harsh Environment FPSOs  
Jeong Heon Na, Woo Chang Lee, Hyun Soo Shin and In Kyu Park ........................................... 114

On the Dynamic Positioning System of FPSO  
Youngkyu Ahn, Katsuro Kijima and Yoshitaka Furukawa ........................................................ 118

Improvement of Position Keeping Performance and Its Effect on the Operation Rate in FPSO Tandem Offloading  
Ikuo, Yamamoto, Masaru Ihara, Hirooki, Hirayama and Norihiko Okamoto, Masami Matsuura and Eiichi Kobayashi ................................................................. 124
Experimental Study on a Spread Catenary Mooring for FPSO
Riccardo Codiglia, Giorgio Contento, Fabrizio D’Este, Filiberto Galeazzi, Vincenzo Sole, Alessia Coan and Massimiliano Spezzati ................................................................. 132

Dynamic Behavior of a DICASFPSO and Shuttle Vessel under the Action of Wind, Current and Waves
Helio Mitio Morishita and Jessé Rebello de Souza Junior ...................................................... 142

Stabilization of Unstable FPSO-Shuttle Tanker Motions
Dong H. Lee, Hang S. Choi and In K. Park ................................................................. 151

Spectral Fatigue Analysis for Side Longitudinals and Hopper Knuckle Connection in VLCCs and FPSOs
Yeong-Pyo Kim, Sung-Gun Park, Seock-Hee Jun and Joo-Ho Heo ..................................... 157

A Direct Calculation Approach for Designing a Ship-shaped FPSO’s Bow Against Wave Slamming Load
Ge Wang, Shaohie Tang and Yung Shin ................................................................. 163

Hull/Mooring/Riser Coupled Dynamic Analysis of a Tanker-Based Turret-moored FPSO in Deep Water
Y.B. Kim and M.H. Kim ................................................................. 169

Time Domain Simulation of Ringing of Heidrun TLP
Amitabh Kumar and C.H. Kim ................................................................. 176

Investigation of Deep Water Installation Operations in Random Waves and Current
P. Teigen ................................................................. 184

A Case Study on the Evaluation of Floating Hose Forces in a C.A.L.M. System
Francisco Edward Roveri, Luis Volnei Sudati Sagrilo and Federico Barranco Cicilia ....... 190

Heave and Pitch Motions of a Spar Platform with Damping Plate
Jun B. Rho, Hang S. Choi Woo C. Lee, Hyun S. Shin and In K. Park ..................................... 198

A Study on Kinematical Stabilities of the Cylinder Type Spar Buoy
Ro-Sik. Park and Sang-Dong Kim ................................................................. 202

Modelling and Simulation of Offshore Crane Operations on a Floating Production Vessel
Thuong Kim Than, Ivar Langen and Oddvar Birkeland ..................................................... 209

A Simulation Program to Support Decisions in Offloading Operations

Hull/Mooring/Riser Coupled Spar Motion Analysis with Buoyancy-Can Effect
A. Tahar, Z. Ran and M.H. Kim ................................................................................. 223

Coupled Effects of Risers/Supporting Guide Frames on Spar Responses
Xinyu Zhang and Jun Zou ......................................................................................... 231

Dynamic Response Analysis of Onshore Wind Energy Power Units during Earthquakes and Wind
   Osamu Kiyomiya, Tatsuomi Rikiji and Pieter H.A.J.M. van Gelder ......................... 520

Design Method of Wave Power Generating System with Wells Turbine
   Masami Suzuki and Chuichi Arakawa ........................................................................ 527

Emitted Sound from Inclined Circular Cylinder and Three-Dimensional Flow Structure in Wake
   Yasutake Haramoto, Kazuyoshi Matsuaki, Mizue Munekata and Hideki Ohba ............. 534

Identification of Non-linear Flow Characteristics of the LIMPET Shoreline OWC
   Matt Folley and Trevor J. Whittaker ........................................................................... 541

Effects of Submerged Vertical Plates and Air chamber Units in Hydroelastic Response Reductions
   Tomoki Ikoma, Hisaaki Maeda and Koichi Masuda, Chang-Kyu Rheem and Mamoru Arita 547

Wave Elevations in the Chamber of the Oscillating Water Column Tank
   Sang-moo Lee and Seoung-gun Kim .......................................................................... 553

An Attempt to Make High Performance Wave Energy System
   Kesayoshi Hadano, Misao Hashida and Michio Sato ................................................. 556

Performance of a Radial Turbine for Wave Power Conversion

Numerical Trial for Darrieus-type Alternating Flow Turbine
   Katsuya Ishimatsu, Kazuyuki Kage and Toyoyasu Okubayashi .................................. 568

Floating Buoy Type Energy Collector for Tidal Current Power Generation
   (Proposition of Desirable Profile and Preliminary Investigation)
   Toshinori Kashiwabaram, Yuji Nakanishi, MitsuoUno and Toshiaki Kanemoto ............. 575

A Study of Wave Energy Conversion Systems Using Ball Screws – Comparison of Output Characteristics of the Fixed Type and the Floating Type
   Taichi Matsuoka, Kenichiro Omata, Hiroyuki Kanda and Kenichiro Tachi .................... 581

Overview and Initial Operational Experience of the LIMPET Wave Energy Plant
   Cuan B. Boake, Trevor J.T. Whittaker, Matt Folley and Hamish Ellen .......................... 586
The Offshore Floating Type Wave Power Device “Mighty Whale”
Open Sea Tests – Performance of The Prototype –
Hiroyuki Osawa, Yukihisa Washio, Teruhisa Ogata, Yasusi Tsuritani and
Yoshinori Nagata ................................................................. 595

The Offshore Floating Type Wave Power Device “Mighty Whale”
Open Sea Tests– Environmental Conditions –
Yoshinori Nagata, Seiya Yamashita, Yukihisa Washio, Hiroyuki Osawa,
Teruhisa Ogata and Yasusi Tsuritani ........................................ 601

Prospect of Economical Wave Power Electric Generator by the Terminator
Backward Bent Duct Buoy (BBDB)
Yoshio Masuda, Toshiari Kuboki, Tony Lewis, Xianguang Liang and Peiya Sun .......... 607

Cost Analysis of the Wave Power Extraction at Breakwaters
Hideo Kondo, Fumikazu Taniguchi, Senji Osanai and Tomiji Watabe ......................... 614

Instability and Transition of Effluent Flow from Ocean Thermal Energy Conversion (OTEC)
Power Plants
Takahiro Adachi, Toshiko Fujii, Yasuyuki Ikegami and Haruo Uehara ....................... 619

Hydrogen Production Using OTEC
Yasuyuki Ikegami, Kenji Fukumiya, Kiyonori Okura, Sadayuki Jitsuhara and
Haruo Uehara ........................................................................ 626

Extraction Condition of OTEC Using the Uehara Cycle
Nobuo Noda, Yasuyuki Ikegami and Haruo Uehara .................................................. 631

Heat Transfer Coefficients of Ammonia/Water Mixture for an OTEC Plant using
Metal-Sprayed Surface
Hirofumi Arima, Masanori Monde, Yuhichi Mitsutake, Yasuyuki Ikegami and
Haruo Uehara ........................................................................ 635

Simulation and Evaluation of Transient Performance of Ocean Thermal Energy
Conversion Plant with Working Fluid of Binary Mixtures
Ou Bai, Masatoshi Nakamura, Yasuyuki Ikegami and Haruo Uehara ......................... 641

Heave and Pitch Buoy (HPB), A Miniature Wave Energy Converter
Tomiji Watabe, Hirotaka Yokouchi, S.D.G.S.P. Gunawardane and Ajit Thakker .......... 649

Numerical Modelling of the Pendulum Ocean Wave Power Converter using a Panel Method
M. Alves, A. Brito-Melo and A.J.N.A. Sarmento ................................................... 655

Air Turbine with Staggered Blades for Wave Power Conversion

Air Turbine Using Self-Pitch-Controlled Blades for Wave Energy Conversion
Performance Prediction of an Impulse Turbine under Real Sea Conditions Using Numerical Simulation Techniques

An Investigation of the Effects of Reynolds Number on the Performance of 0.6m Impulse Turbines for Different Hub to Tip Ratios
A. Thakker, P. Frawley and H.B. Khaleeq ............................................................................. 682

Hysteretic Characteristics of Wells Turbine for Wave Power Conversion
T.H. Kim, T. Setoguchi, Y. Kinoue and K. Kaneko and M. Inoue ........................................... 687

Numerical Analysis for Unsteady Flow Characteristics of the Wells Turbine
Tae-Hun Kim, Yeon-Won Lee, Ill-Kyoo Park, Toshiaki Setoguchi and Chang-Soo Kang ...... 694

A Novel Turbine for Offshore Wind Energy: Design and Energy Conversion
Valery V. Cheboxarov, Victor V. Cheboxarov, Alexander T. Bekker and Pavel V. Anokhin ........................................... 700

Efficient Wave Energy Amplification with Wave Reflectors
Morten Kramer and Peter Frigaard ....................................................................................... 707

Piezoelectric Eels for Energy Harvesting in the Ocean
Alexandra H. Techet, James J. Allen and Alexander J. Smits ................................................ 713

Motion of a Liquid Drop Exposed to an Airstream
Teruhiko Yoshida .................................................................................................................. 719

A Study on the Hydrodynamic Behavior of Fisheries Cages in Waves
Chan-Kyu Yang, Yoon-Rak Choi, Hyeon-Ju Kim and Keyyong Hong ..................................... 726

Ocean Fertilization by the man-made Sea-Mountains Built with Coal Ash
Concrete Blocks
Tatsuo Suzuki ....................................................................................................................... 734

POLAR AND ICE ENGINEERING

RIDGE AND PACK ICE

Measuring Ice Thickness with EISFlowTM, a Fixed-mounted Helicopter Electromagnetic-Laser System
Simon Prinsenberg, Scott Holladay and James Lee ................................................................. 737

Simplified Ice Ridge-Seabed Interaction Model for Determination of Ice Scour Depth
Kyungsik Choi and Jong-Ho Lee ............................................................................................ 741

Ice Conditions at the Confederation Bridge - Winter 2000
Donald J. Belliveau, Helen Hayden and Simon Prinsenberg .................................................. 748
Some Applications of Computerized Tomography Scanner to Sea Ice
Zhijun Li and Yibin Pu ................................................................................................................ 755

Ice Failure Mode and Ice Load Observed in Medium-Scale Field Ice Indentation Test
Takahiro Takeuchi, Satoshi Akagawa, Naoki Nakazawa, Masafumi Sakai,
Takashi Terashima and Hiroshi Saeki ....................................................................................... 760

ICE FORCES AND PROPERTIES

Friction of Sea Ice on Steel for Condition of Varying Speeds
R. Frederking and A. Barker ...................................................................................................... 766

Preliminary Study of Mechanical Properties of Bohai Ice under Dynamic Loading
Chenglin Zhou, Wei Ma, Zhijun Li, Xiaoxiao Chang and Yibin Pu ........................................ 772

Hydroelastic Response of Cylindrical Shell Structures during Earthquakes in Ice-Covered Seas
Takuji Hamamoto and Toshifumi Nojima ................................................................................ 777

Calculation of Parameters of Local Ice Loads on Data of Full Scale Tests of Ice Belt Structures
Oleg Ya. Timofeev and Nina A. Krupina ................................................................................... 785

ICE-OCEAN INTERACTIONS

Wave Propagation Across an Oblique Crack in an Ice Sheet
Timothy D. Williams and Vernon A. Squire ............................................................................. 791

Evaluation of Seismic Load on the Marine Structure in Ice-covered Waters
Hiroshi Kobayashi ...................................................................................................................... 796

Numerical Simulation on Ice-Structure Interaction during Earthquakes
Y. Yamauchi, K. Kamesaki and M. Hyodo .............................................................................. 802

Propagation of Flexural Waves at the Interface Between Floating Plates
Hyuck Chung and Colin Fox ...................................................................................................... 808

PACK ICE AND OIL SPILLS

A Numerical Model for the Simulation of Oil Spreading under Ice Cover
Shigeki Sakai, Xiaodong Liu and Izumiyama Koh ..................................................................... 816

Experimental Study on Spreading of Oil under Ice Covers
Koh Izumiyama and Akihisa Konno and Shigeki Sakai ........................................................... 821
Experimental Study on Oil / Water Separating System Using Conduit with Circular Cross Section
Natsuhiko Otsuka and Noriyuki Sato, Kouji Ogiwara, Kouhei Kanaami and Hiroshi Saeki ................................................................. 827

Response of a Floating Ice Plate to a Moving Load
F. Dias and E. Parau .................................................................................................................. 833

Development of an Operational Ice Dynamics Model for the Canadian Ice Service
Mohamed Sayed, Tom Carrieres, Hai Tran and Stuart B. Savage ........................................ 841

Ice Drift, Induced by the Wind Influence on the Northeastern Shelf of Sakhalin Island
Elena Tikhonchuk, Victor Tambovsky and George Shevchenko ........................................... 849

ADDITIONAL PAPERS

Determination of Extreme Wave Loads on an FPSO in Complicated Wave Conditions
Chuntian Zhao and Jer-Fang Wu.......................................................................................... 853

Output Characteristics of Darrieus Water Turbine with Helical Blades for Tidal Current Generations
Mitsuhiro Shiono, Katsuyuki Suzuki and Seiji Kiho................................................................. 859

Mechanical Strength of Consolidated Sea Ice Rubble- in case of First-Year Sea Ice at Notoro Lagoon, Hokkaido
Zenji Kamio, Junichiro Ushikoshi, Hisao Matsushita, Takashi Terashima and Hiroshi Saeki ......................................................................................................................... 865

Improvement of Soft Marine Clays by Deep Mixing Technique
S. Horpibiulsuk; N. Miura; T.S. Nagaraj and H. Koga ............................................................... 584

The Stress-Strain Behavior of Geotextiles under Puncture Loads in a Liner System
Kwang Yeol Lee, Chin Gyo Chung, Taik Jean Hwang and Seong Hyun Yoon............................ 592

Considerations for Judging the Suitability of Substitute Filling Materials for Compaction Pile Methods
Hideo Tsuboi, Kenji Harada, Yasuo Tanaka and Tamotsu Matsui ............................................. 598

Influence of Freezing on the Dynamic Properties of A Silty Sand
Yao-Chung Chen and Chao-Chong Huang.................................................................................. 604

Case Study on Ground Improvement by High Pressure Jet Grouting
Hong, Won-Pyo, Kim, Dong-Wook, Lee, Mun-Ku and Yea, Geu-Guwen............................... 610

Effects of the Fines Content in Soil on Stress Attenuation During Dynamic Compaction
Jing-wen Chen and Chih-ying Lin............................................................................................. 616

An Analysis Model for a Hybrid Interactive System Involving Compressible Buffer Material
Hemanta Hazarika and Seishi Okuzono....................................................................................... 622

Estimation of Proper Strain Rate in the CRSC Test Using a Artificial Neural Networks
Jun Sik Chae, Hyung Kyu Park and Song Lee ........................................................................... 630

Undrained Cyclic Strength of a Hydraulic Coal Ash
Jin-Hung Hwang........................................................................................................................... 635

Soil-Water Characteristics of Unsaturated Organic Silty Soils
Jong-Beom Kang, Bang-Woong Shin, Seong-Taek Bang and Jun-Dae Lee............................... 643

BEARING CAPACITY

Installation and Pull-Out Capacities of Drag-In Plate Anchors
Sarah Elkhatib, Breyden Lonnie and Mark F. Randolph ............................................................ 648

Discrepancy Between Safety Factors of Slope Stability on the Two Layers Problems Taken by Fellenius and Bishop Methods
Mitsuharu Fukuda, Seiji Suwa, Yutaka Kato and Tomoe Shimonodan........................................ 655

Impact on an Existing Tunnel Due to Nearby New Tunneling
Chung-Jung Lee, Chien-Ru Wu, Bing-Ru Wu and Shang-Chi Yang........................................... 660

Data Base Establishment in Hua Fan University as Slope Monitoring Test Site
Shiou Chen, Chen-Ping Chao, Ching-Jiang Jeng and Shun-ping Tsao...................................... 666
Bearing Capacity of Light Weight Soil using Recycled Styrofoam Beads
Se Wook Oh, Jong kyu Lee, Young Cheul Kwon and Bong Jik Lee ................................................. 670

Behaviors of Foundation System Improved with Stone Columns
Woo-Seok Bae, Bang-Woong Shin, Byung-Chul An and Joo-Sub Kim.............................................. 675

Penetration Analysis of Spudcan Foundations In NC Clay
Z. Mehryar, Y. Hu and M.F. Randolph ........................................................................................ 679

Bearing Capacity Enhancement of Skirted Foundation Element by Electrokinetics
S. Micic, J.Q. Shang and K.Y. Lo ........................................................................................................ 685

Effect of Strength Non-Homogeneity on the Bearing Capacity of Circular Skirted Foundations Subjected to Combined Loading
Susan Gourvenec and Mark Randolph ........................................................................................... 693

Application of a Small Beam Centrifuge in Offshore Foundation Engineering
H.G.B. Allersma .............................................................................................................................. 699

Applications of the Scaled Boundary Finite-Element Method to Offshore Geotechnical Problems
J.P. Doherty and A.J. Deeks ............................................................................................................... 706

Application of Ground Penetrating Radar on the Void-Detection in Levee
Ni, Sheng-Huoo, Chen, Ching-Kuan, Lin and Hong-Ming ............................................................... 712

Review of Penetration Resistance Based on In-situ Monitoring
Naoki Masui, Masato Ito, Yasuhiro Iida, Hiroshi Yoneda, Yosinobu Zenda and Jon Hermstad ............................................................................................................................................. 717

Field Measurements of the Pullout Capacity of Mooring Anchors
Yoshi-hiko Maeno, Motoyasu Ishikawa, Yoshihito Tobita and Yuji Kumagai .................................... 723

Differences of the Wave-Induced Soil Response Between Dynamic and Quasi-Static Solutions

Effects of Wave Non-Linearity on the Wave-Induced Seabed Response
Y.N. Oh, D.S. Jeng, H.T. Teo and D.H Cha .................................................................................... 738

SEABED ENGINEERING

Coastal Morphological Evolution Investigation on Yunlin Offshore Industrial Estate
Chin-I Liu, Tai-An Shih and Jung-Chang Su ..................................................................................... 745

Dynamic Amplification Property of Microtremors on Reclaimed Lands along Osaka Bay
Kiyoshi Hayakawa, Tamotsu Matsui and Teruyuki Hamada .......................................................... 750
An Analysis of Containment Transport in the Aquifer of Coastal Area
Chu-Kuan Lin, Don Kulasiri and Cheng-Haw Lee

3-D Beach Deformation around an Offshore Man-Made Island due to Multi-Directional Random Waves
Masaaki Ikeno and Takao Shimizu

Nearshore Profile Change of Niigata West Beach
Keiji Kuroki, Kiyoshi Chikagawa, Toshiyuki Asano and Michio Sato

A Comprehensive Experimental Study of Sand-Steel Interfaces Subjected to Various Monotonic and Cyclic Stress Paths
Kazem Fakharian and Erman Evgin

SUCTION CAISSONS

Shear Strength Along Outside Wall of Suction Anchors in Clay after Installation
Knut H. Andersen and Hans P. Jostad

Numerical Analysis of the Behavior of Suction Caissons in Clay

Penetration Resistance of Suction Caissons in Clay

Three-Dimensional Numerical Analysis of Jack-Up Structures on Sand
Mark J. Cassidy and Britta Bienen

Field Validation of Suction Pile Installation in Clay
Y. Cho, T.H. Lee, J.B. Park, D.J. Kwag and E.S. Chung

The Use of Piles to Stabilize a Cut Slope in Soft Ground
Won-Pyo Hong, Young-Suk Song, Do-Soon Shin and Seoung Joo Lee

Inclined Loading Capacity of Suction Piles
Y. Cho and S. Bang

ADDITIONAL PAPER

Response Characteristics of Soft Settled Type of Offshore Structures Subjected to Harmonic Surface Wave and Ground Excitation
Tadahiro Fukusumi and Kenji Tamura
The Proceedings of
The Twelfth (2002) International
OFFSHORE AND POLAR
ENGINEERING CONFERENCE

VOLUME III, 2002

PLENARY PRESENTATION, METOCEAN (WAVES, SEA STATE, CLIMATOLOGY AND WAVES), HYDRODYNAMICS (NUMERICAL WAVE TANK, NUMERICAL AND BASIN WAVES, DYNAMICS AND FORCES, VORTEX AND VIBRATIONS), COASTAL ENGINEERING (PORT AND HARBOR, SEDIMENTATION, WAVES, ACOUSTICS AND CURRENT, FORCE AND STABILITY, PERFORATED STRUCTURE, BREAKWATER DYNAMICS)

How to Use This Table of Contents

Scroll down or use the bookmarks in the left-side frame to move to a new location in this index.
Click on a blue paper title you like to view.
To return to this index after viewing a paper, click on PREVIOUS MENU bookmark in the left-side frame.

This CD-ROM was created from the author-made PDF files, except some 16% of the papers from scanning the authors’ hard-copy originals. View quality of the text and graphics and the ease of readability depend largely on the quality and/or consistency of the individual author’s hard copy originals for scan or the PDF-making procedure the authors used.

CONTENT

PLENARY PRESENTATION

Fluid Dynamics of Finned Bodies – From VIV to FPSO  
Ronald W. Yeung ............................................................................................................................ 1

METOCEAN

WAVES

Height-Length Joint Distributions for Computation of Static Wave Loading on Floating Bodies  
Jesper Ryde’n, Sylvie van Iseghem, Michel Olagmon and Igor Rychlik ........................................... 12

How Fast Are the Two-Dimensional Gaussian Waves?  
Anastassia Baxevani, Krzysztof Podgo’rski and Igor Rychlik ....................................................... 18

Wave Kinematics of Short-Crested Waves  
H.T. Teo, D.S. Jeng, D.F. Cha and Y.N. Oh ................................................................................... 26

On the Contribution of Swell to Sea Surface Phenomena (2)  
Hisashi Mitsuyasu and Yuichi Maeda ............................................................................................ 31

Occurrence Probability of Wave Grouping for Different Shapes of Wave Energy Spectra  
Berguzar Oztunali Ozbahceci, Tomotsuka Takayama, Hajime Mase and Aysen Ergin ................. 37

Wave Groups Induced Low Frequency Waves  
Guohai Dong, Bin Teng and Liang Cheng ...................................................................................... 43

A New Analysis Method of Observed Directional and Infra-gravity Waves based on Frequency Banded Spectrum Power  
Toshihiko Nagai, Noriaki Hashimoto, Koji Kawaguchi, Masanobu Kudaka and Masao Mitsui ............................................................................................................................... 49

Analysis of Various Wave Components on the Relationship Between Non-dimensional Roughness Length and Wave Age  
Naoya Suzuki, Naoto Ebuchi, Chaofang Zhao, Daisuke Kobayashi, Isao Watabe and Yasuhiro Sugimori ..................................................................................................................... 55
Improved Least Square Method for Selecting Design Wave Height
    Sheng Dong and Tomotsuka Takayama ................................................................. 60

Multiscale Time Series Modelling of Significant Wave Height
    Ch.N. Stefanakos, G.A. Athanassoulis and S.F. Barstow ..................................... 66

SEA STATE

A Note on Wave State Dependence of Sea-Surface Roughness
    Dongliang Zhao ........................................................................................................ 74

The Effect of Wind Waves on Langmuir Circulations
    Ken-ichi Uzaki, Yukiko Uragami and Nobuhiro Matsunaga .................................. 81

Roles of Wind Wave Breakers in Momentum Transfer Processes from Wind to
    Currents and Turbulences
    Toshinori Ogasawara, Takashi Yasuda and Masanori Takeda .................................. 85

A Study on Simulating the Time Series of Significant Wave Heights near the
    Keelung Harbor
    John Z. Yim, Chung-Ren Chou and Ping-Chun Ho .................................................. 92

Estimation of Wind at Sea with Land-Sea Coefficient (Roughness, Topography and
    Contraction) from Wind Observed on Land
    Ryuji Koh .................................................................................................................. 97

Wave Duration/Persistence Statistics, Recording Interval, and Fractal Dimension
    Alastair D. Jenkins ...................................................................................................... 103

A Coupled Model of Waves and Currents in the Irish Sea
    Judith Wolf, Sarah L. Wakelin and Jason T. Holt ..................................................... 108

Development of Long-Range Ocean Radar System and Preliminary Results
    Kenji Sato, Takeshi Matsuoka and Satoshi Fujii ...................................................... 115

Directional Ocean Wave Spectra from Marine Radar
    Tsugukiyo Hirayama, Seung Geung Park, Fabio-kawaoka.Takase, Yoshiaki Hirakawa and
    Takehiko Takayama ..................................................................................................... 119

A New Wave Monitoring System on the Ocean Platform “COMPASS”
    Tetsuro Ikehuchi, Naoyuki Takatsu, Toshiyuki Kita, Norihito Okada, Wataru Koterayama,
    MasahikoNakamura, Satoshi Fujii and Kenji Sato .................................................... 124

CLIMATOLOGY AND WAVES

Compound Bivariate Extreme Distribution of Typhoon Induced Sea Environments and Its
    Application
    Liu Defu, Wen Shuqin and Wang Liping .................................................................... 130

Model- and Field- Experiments on a Wave Observation Buoy
Wataru Koterayama, Masahiko Nakamura, Kenji Sato and Tetsuro Ikebuchi ......................... 430

Onboard Ship Motion Analyzer Based on Nonstationary Time Series Analysis
Daisuke Terada and Toshio Iseki ............................................................................................ 438

A New Device of Pitch Motion Reduction of Floating Structure
Shinkichi Tanigaki, Masami Matsuura, Shuho Yano and Hitoshi Kumamoto ....................... 444

A Study on the Decrement of Work Efficient by the Oscillation
Yoshiaki Kawamura, Kuniaki Shoji, Kiyokazu Minami and Junko Hayashi ......................... 452

Modeling of Hybrid-Fender in Numerical Simulation Method on Ship Motions
Masayoshi Kubo, Shigeki Sakakibara, Katsuhiko Saito, Toshiharu Yoshida,
Shigemi Satou and Tsuyoshi Oki ......................................................................................... 457

Higher-Order Statistical Moments of Wave-Induced Response of Offshore Structures
Via Efficient Sampling Techniques
G. Najafian, R. Burrows, R.G. Tickell and A.V. Metcalfe .................................................... 465

A Finite-Element Computation for the Sloshing Motion in LNG Tank
J.W. Kim, Y.S. Shin and K.J. Bai .......................................................................................... 471

Spatial Distribution of the Wave Around Multiple Floating Bodies
Masashi Kashiwagi and Yuhki Ohwatari ............................................................................... 479

Simulation of Second-order Radiation of 3D Bodies in Time Domain by a B-spline Method
Bin Teng, Wei Bai and Guohai Dong .................................................................................... 487

Time-Domain Simulation of Nonlinear Free Surface Flow Around Floating Sea Caches
Including Wave and Current Effects
Hamn-Ching Chen, Tuanjie Liu and Erick T. Huang .............................................................. 494

VORTEX AND VIBRATIONS

Vortex Induced Vibrations Experiments with an Elastically Mounted Cylinder in Water
C.P. Pesce and A.L.C. Fujarra ............................................................................................... 502

Experimental Study of an 8-shaped Oscillating Flexible Riser
Akiyoshi Bando, Koji Otsuka, and Yoshiho Ikeda ................................................................. 510

Vortex-Excited Vibration of a Circular Cylinder in Planar Oscillating Flow
Kenjirou Hayashi, Futoshi Higaki, Toshiyuki Shigemura and John R. Chaplin ..................... 516

VIV of Two Cylinders in Tandem Arrangement: Analytical and Numerical Modeling
M.L. Facchinetti, E. de Langre, E. Fontaine, P.A. Bonnet, S. Etienne and F. Biolley .......... 524
Steady Flow Patterns and Interactions around Vertical Cylinders
Chul H. Jo, Doo H. Kim, Uh C. Jeoug and Young S. Shin ............................................................... 532

COASTAL ENGINEERING

PORT AND HARBOR

Study of Siltation Protection in Asian Ports
Isao Irie, Rahman Hidayat, Kentarou Morimoto and Nobuyuki Ono ............................................... 539

Statistical Design of Fender for Berthing Ship
Shigeru Ueda, Toshihiko Hirano, Satoru Shiraishi, Shyu Yamamoto and Seigi Yamase ............ 545

Assessment of Pier Pile Failure Resulting from 1995 Kobe Earthquake
Makoto Ishida, Shigeru Ueda, Tomoyuki Ikeuchi and Takayuki Suzuki ........................................ 552

Deformation Mechanism of Kemigawa Artificial Beach in Tokyo Bay
Akio Kobayashi, Takayuki Kumada, Takaaki Uda, Toshiro San-nami and Masumi Serizawa ................................................................. 560

Mechanism of Stabilization of Beach Profile under Storm Waves
Nobuyuki Ono, Isao Irie, Masaki Yokota and Hiroshi Yamaguchi .................................................... 567

Variation of Beach Processes and Harbor Sedimentation in an Area of Large Tide
JoongWoo Lee and SeungHo Shin .................................................................................................. 572

Bed Load Sediment Movements in Swash Zone
Md. Azharul Hoque and Toshiyuki Asano ....................................................................................... 582

Prediction of Undertow and Beach Profile Change over Barred Beach
Masamitsu Kuroiwa, Yuhei Matsubara, Takayuki Kuchiishi, Kenichi Kato and Hideaki Noda ................................................................. 590

A Study on Dynamic Behavior of the Seabed around a Seawall under Wave Motion
Using the VOF-FEM Model
Shiro Maeno, Lechoslaw G. Bierawski and Shuji Fujita .............................................................. 597

WAVES

Wave Transmission over Natural and Artificial Forelands
Nicole von Lieberman and Stephan Mai .......................................................................................... 604

An Improved Time Domain Procedure for Separating Incident and Reflected Water Waves
Akira Matsumoto, Masashige Tayasu, Setsuo Matsuda, Tue Hald and Hans F. Burcharth ...... 609

Wave Shoaling on Steep Slopes and Breaking Criteria
Ching-Piao Tsai, Hong-Bin Chen and Ming-Jen Huang .................................................................. 617
Experimental Study on Resonant Phenomena in a Narrow Open Channel under Waves  
Takehisa Saitoh, Guoping Miao and Hajime Ishida................................................................. 622

Characteristics of Partial Reflection Boundary with Porous Layer on the Boussinesq Model  
Katsuya Hirayama ....................................................................................................................... 628

WAVES AND ACOUSTICS

M.W.L. Fluctuations Inside a Cooling Water Tank Set Inside a Coral Reef  
Julio Monroy, Ryuchiro Nishi, Michio Sato, Kazuo Nakamura, Sadao Fujihat and  
Kouji Tsunoue ......................................................................................................................... 634

Calibration of Abu Dhabi Tidal Scale Model  
Khaled A. Mohamed.................................................................................................................... 640

The Interactions between Long Wave and Circular Island with the presence of  
Weak Currents  
M.C. Lin, C.M. Hsu and C.L. Ting ............................................................................................ 646

Experimental Study on the Effect in Reducing Tsunami by the Coastal Permeable Structures  
Kenji Harada, Fumihiko Imamura and Tet suya Hiraishi......................................................... 652

WAVE AND CURRENT

Some Remarks on River Mouth Flow  
F. Lalli, M. Miozzi and G.P. Romano ....................................................................................... 659

Effects of a Current Field on the Characteristics of Irregular Waves  

Vertical Distribution of Radiation Stresses and 3-D Nearshore Currents around  
Coastal Structures  
Hisamichi Nobuoka and Nobuo Mimura .................................................................................. 672

Mass Transport Velocity of Bi-viscous Mud Under Progressive Waves  
Chiu-On Ng and Sau-Chung Fu ............................................................................................... 680

Numerical Simulation of Wave and Current to Estimate Sand Lift-out  
Through Rubble Mound  
Tsutomu Sakakiyama and Kazuhiro Suzuki .............................................................................. 684

Velocity Measurement of a Sea Wall Model by Surface Flow PIV  
Beom-Seok Kim, Jeong-Hwan Kim, Ho-Keun Kang, Mi-Young Kim, Bo-Yeon Hwang and  
Young-Ho Lee ......................................................................................................................... 690
FORCE AND STABILITY

A Behavior Analysis of a Breakwater Caisson with Piles
  Tomoki Maeda................................................................................................................................. 696

Frequency Domain Analysis of Dynamic Wave Pressures on Deeply Embedded Large Cylinder Structures Due to Random Waves
  Hai-xiao LIU................................................................................................................................... 702

Deformation and Mooring Force of Membrane and Net Sheet in Flow
  Akio Yasui and Ichiro Deguchi....................................................................................................... 709

Numerical Simulation of Deformation of Rubble Structures by DEM and VOF
  Kazunori Itoh, Yuichi Higuchi, Takao Toue and Hidehiro Katsui................................................ 714

Stochastic Estimation of Stability of Rubble Stones for Submerged Breakwater
  Susumu Araki and Ichiro Deguchi.................................................................................................. 722

Study on the Resistance Characteristics Inside Large Grain Media
  Chung-Pan Lee, Jenn-Yuan Chen and Wen-Kuei Ker................................................................... 728

PERFORATED STRUCTURE

Regular Waves Acting on Double-layered Perforated Caissons
  Xuefeng Chen, Yucheng Li and Dapeng Sun.................................................................................. 736

Three-Dimensional Experimental Study of Wave-Induced Flow Around a Permeable Breakwater
  Aliasghar Golshani, Norimi Mizutani, Dong-Soo Hur and Hideyuki Shimizu............................. 744

Experimental optimization of perforated structures in presence of ship generated waves
  Andrea Panizzo, Rodolfo Piscopia and Paolo De Girolamo......................................................... 752

Environmental and Safety Considerations for Design of a Perforated Sea wall
  T.L. Yip, Dao-Hua Zhang and Allen T. Chwang............................................................................ 758

BREAKWATER DYNAMICS

The Interaction Of Fully Nonlinear Waves with Floating Breakwaters
  Bang-Fuh Chen and Pei-Hong Chen ............................................................................................... 764

Performance of Wave Absorption by a Steel Floating Breakwater with Truss Structure
  Nobuhiro Matsunaga, Misao Hashida, Ken-ichi Uzaki, Takayuki Kanzaki and Yukiko Uragami ......................................................... 768

Study on the Performance of a Floating Breakwater with Two Boxes
  Shunichi Ikesue, Kazumi Tamura, Yasuhiro Sugi, Mikio Takaki, Kazuyoshi Kihara and Masami Matsuura ........................................................................................................ 773
Effect of Submerged Breakwater to Wave Runup
Jea-Tzyy Juang and Chao-Fu Lin .............................................................. 779

Wave Field Behind a Double-Submerged Breakwater
Akinori Yoshida, Shuguang Yan, Masaru Yamashiro and Isao Irie.......................... 785

A Two-Phase Flow Model of Wave-Induced Sheet Flow
Ho-Shong Hou, Tai-Wen Hsu and Chih-Min Hsieh ........................................ 791

Engineering Characteristics of Artificial Benthic Reefs at Three Sites off
Southwestern Coast of Taiwan
Wen-Miin Tian .................................................................................................... 798

Hydraulic Characteristics of a Vertical- Motioned Wave Attenuation Device with a Floating
Body and Submerged Horizontal Plate
Haruyuki Kojima, Shuguang Yan, Akinori Yoshida and Tunehiro Sekimoto............... 805

A Simple Method for Analysis of the Water Wave Scattering from Structures Composed of
Immersed Thin Walls
Shohachi Kakuno, Hiroyumi Nakakahara, Tsunearu Orihashi and Yoshi Shiozaki ........... 812

A Study on Wave Transmission Coefficients of Plate-type Breakwater
Haigui Kang and Ke Wang .................................................................................... 816

Transportation of Water Spray on Non-Wave Overtopping Type Seawall
Yuji Kamikubo, Keisuke Murakami, Isao Irie, Yoshihiro Hamasaki, Yatsushiro and
Kumamoto ............................................................................................................. 821

ADDITIONAL PAPERS

On identification of VIV modes from measurements
Karl E. Kaassen ............................................................................................... 827

Analytic Solutions of Nonlinear Wave and Structure Interactions
Jaw-Fang Lee and Ding-Chen Tzeng.................................................................... 834

Experimental Study on Behavior of Tandem and Side-by-side Moored Vessels
S.Y. Hong, J.H. Kim, H.J. Kim and Y.R. Choi .................................................... 841

Operation Results of the hybrid anti-rolling system on board the R/V Mirai in the
North Pacific Ocean
Satoshi Tsukioka, Hiroyasu Momma, Tomoyoshi Takeuchi and Satoshi Ueda ............... 848

CONTENT

TABULAR STRUCTURES

STATIC STRENGTH

The Effect of Chord Pre-Load on the Static Strength of Uniplanar Tubular K-Joints
G.J. van der Vegte, Y. Makino and J. Wardenier................................................................. 1

An Automatic FE Mesh Generator for CHS Tubular Joints
X.D. Qian, A. Romeijn, J. Wardenier and Y.S. Choo....................................................... 11

Static Analysis of Frame by Localized Representation of Tubular Joint
W. Pan, S.B. Leen, T.H. Hyde............................................................................................. 19

Initial Study on the Static Strength of Thin-Walled Rectangular Hollow Section (RHS) K-Joints with Gap
S. Sarada, O. Fleischer1 and R. Puthli1 .................................................................................. 26

The Strength of Multiplanar Overlap KK-Joints of Rectangular Hollow Sections Under Axial Loading
D. K. Liu and J. Wardenier................................................................................................. 34

Theoretical and Measured Torsional Behaviour of Rectangular Hollow Sections
Daniel J Ridley-Ellis, John S Owen and Gwynne Davies.................................................. 41

Static Strength of Doubler Plate Reinforced X-joints Under In-Plane Bending
Y.S. Choo, J.X. Liang and J.Y.R. Liew............................................................................... 48

CONCRETE FILLED MEMBERS

Grout Sleeve Connections under Large Deformation Cyclic Loading
Xiao-Ling Zhao, Paul Grundy and Yee-Teck Lee................................................................. 53

Push-out Strength of Concrete Plugs in Tubular Steel Piles
A. Nezamian, R. Al-Mahaidi, P. Grundy and B. O’Loughlin ............................................... 60

Strength and Deformability in Diaphragm-Stiffened Connections of Beam Flanges to Circular CFT Columns
Kozo Nakada and Akihiko Kawano..................................................................................... 65
Numerical Analysis of Concrete-Filled Steel Tubes Subjected to Axial Force
Hsuan-Teh Hu, Chiung-Shiann Huang, Ming-Hsien Wu and Yih-Min Wu ................................. 73

An Analytical Approach for Seismic Behavior of Concrete Filled Tubular Column Bases
Tao Li, Akihiko Kawano, Junichi Sakai and Li Li ................................................................. 81

Seismic Resistant System of Multi-Story Frames Using Concrete-Filled Tubular Trusses
Akihiko Kawano, Kenji Sakino, Kyoko Kuma and Kozo Nakata ........................................... 89

FRACTURE AND FATIGUE

Finite Element Model for the Fatigue Analysis of Cracked Tubular T-Joints under Complex Loads
S.T. Lie, S.P. Chiew and Z.W. Huang ....................................................................................... 97

Multi-Axes Fatigue Tests of Tubular T-Joints under Complex Loads
S.P Chiew, S.T. Lie and Z.W. Huang ........................................................................................ 103

Stress Intensity Factors for Doubler-Plate Reinforced Connections
Yoo-Sang Choo, Rongrong Jiang and V. Thevendran ............................................................. 111

Brittle Fracture from Ends of CJP Groove Welded Joints
Tsutomu Iwashita, Koji Azuma, Yoshiaki Kurobane and Yuji Makino .................................... 117

COMPOSITES AND SMART STRUCTURES

The “State of the Art” in Composite Material Development and Applications for the Oil and Gas Industry
Jeremy C. Price ...................................................................................................................... 125

Fiber Mooring for Ultra-Deepwater Applications
Christian A. Cermelli and Shankar S. Bhat .............................................................................. 132

Composite Wrapping as a Means of Corrosion Mitigation

Behavior of FRP Composite Fender Piles in Cold
Piyush K. Dutta and Richard G. Lampo ...................................................................................... 143

Dynamic Analysis for the Large Offshore Composite Pipelines Subjected to Waves
Hsien Hua Lee and Y.P. Chung ................................................................................................. 150

Fatigue Studies of FRP Composite Decks at –30°C and 50°C
Piyush K. Dutta, Soon-Chul Kwon, Glenn D. Durell, Lopez-Anido Roberto and Yun-Hea Kim ......................................................................................................................... 155

Buckling/Fracture Behaviour of GFRP Laminated Plates with Initial Delamination
Daisuke Yanagihara, Masahiko Fujikubo and Daisuke Teraue ................................................ 162
Microbend Fiber Optic Sensor System for Pressurized Cylinders
R.H. Knapp, T.A. Shimabukuro and I.N. Robertson ............................................................ 170

Microstructural Study of Stainless Steel Fiber Reinforced Aluminum Composites
Xuelan L. Yue, Shin-ichi Nishida, Nobusuke Hattori and Kouichi Nakano .............................. 175

Mechanical Behavior of Aluminum Alloy Foams
Jong-Shin Huang......................................................................................................................... 180

Gelcoat Blistering and the Use of Glassflakes
Eduardo Ken Tsuzuki, Célia Taniguchi and Antônio Carvalho Filho ....................................... 185

MATERIALS AND WELDING

FATIGUE

Crack Growth Prediction in Girth Welds of Steel Catenary Risers
Ilson P. Pasqualino, Ingrid A. Valeriano and Teresinha M.J. Alves........................................... 192

A New Approach to Fatigue Strength Evaluation of Ship Hull
Y. H. Wang, K. Terai, Y. Tomita, K. Hashimoto and N. Osawa .............................................. 198

Plain Bending Fatigue Properties of Extra-Low Carbon Steels
Shin-ichi Nishida, Nobusuke Hattori, Kwannate Thammamapornphilas,
Tomoyoshi Kawano and Masayoshi Suehiro ............................................................................. 205

Effect of Compressive Mean Stress and Compressive Residual Stress on
Fatigue Properties of Stainless Steel SUS304
Priyo Tri Iswanto, Shin-ichi Nishida, and Nobusuke Hattori .................................................. 209

A New Model for the Fatigue Life Prediction Considering Residual Stress Relaxation
Tak K. Lee, Yong Y. Nam, Seung H. Han and Byung C. Shin .................................................... 214

The Effect of Compressive Residual Stresses of Two-stage Shot Peening for
Fatigue Strength of Spring Steel
Kyung-Dong Park and Chan-Gi Jung .......................................................................................... 220

Fatigue Life Extension of a Through-Thickness Crack Using Local Heating
C.D. Jang, H.C. Song and C.H. Lee ............................................................................................ 224

Micro-Genetic Algorithms (µGAs) for Hard Combinatorial Optimisation Problems
Yunyoung Kim, Koji Gotoh, Masahiro Toyosada and Jewoong Park ........................................ 230

Evaluation of Tensile Strength and Fatigue Strength of 6061 Aluminum Alloy
Friction Welded Joints by Heat Input and Burn-Off Length
H. Ochi, T. Sawai, Y. Yamamoto, K. Ogawa and Y. Suga .......................................................... 236
Penetration Control by Monitoring Molten Pool Oscillation in TIG Arc Welding

Jianbin Ju, Yasuo Suga and Koichi Ogawa

Study on Mathematical Model for Turbulent Combustion in the Impinging Jet Flame during Line Heating Process

Junji Sawamura, Yasumitsu Tomita, Naoki Osawa and Kiyoshi Hashimoto

CORROSION AND WELDING

Probabilistic Modeling of Pitting Corrosion Fatigue Life

Q.Y. Wang, N. Kawagoishi, Q. Chen and R.M. Pidaparti

The Protective Effectiveness of Cathodic Protection for Sand Erosion in Waves Sea

Hidenori Hamada, Masami Abe and Shigeru Ueda

Mathematical Equations of the Influence of Molybdenum and Nitrogen in Welds

Tomasz Wegrzyn

An Experimental Investigation for Influence of Ambient Pressure on Arc-Electrode Behavior

Yoji Ogawa, Zhimao Yang, Jun Matsuda and Takao Morita

Recognition of Seam Deviation Using Artificial Neural Networks in Vision-Based Seam Tracking of Underwater Flux-Cored Arc Welding

Guorong Wang, Yonghua Shi, Ming Liang, Jiguang Zhong and Xiao Liao

ADVANCED MATERIALS AND METHODS

Ultra High Strength Linepipe – The Implications for Pipeline Operations

Brian L. Jones and David G. Jones

Development of Linepipe For Deep-water Applications

H.-G. Hillenbrand, M.K. Graef, J. Groß-Weege, G. Knauf and U. Marewski

Deepwater Welding for Installation and Repair – A Viable Technology?

Ian M. Richardson, Neil J. Woodward and John Billingham

Development of Weldable Super 13Cr Martensitic Stainless Steel for Flowline

K. Kondo, K. Ogawa, H. Amaya, M. Ueda and H. Ohtani

Effect of Roller Working on Fatigue Properties of Eutectoid Steel

Wenxian Sun, Shin-ichi Nishida and Nobusuke Hattori

WELDING DEFORMATION

Development of Welding Deformation Control Method for Hull Structure of Ro/ Ro Passenger Ferry

Sang-II Kim, Joong-Kyoo Kang and Jong-Man Han
Development of the Welding Deformation Estimation Method for High Accuracy Production System in Shipbuilding
   Mitsuyoshi Nakatani and Morihiko Ohsawa ................................................................. 321

Finite Element Analysis Using Interface Element for Predicting Deformation during Butt Welding Considering Root Gap and Tack Welds
   Masakazu Shibahara, Hisashi Serizawa, Hidekazu Murakawa and Yukio Ueda ................................................................. 325

Effect of Welding Conditions on Residual Stress Distributions and Welding Deformations in Welded Structure Materials
   Toshio Terasaki ................................................................................................................... 332

Theoretical Prediction of Welding Distortion Considering Positioning and the Gap Between Parts
   Dean Deng, Hidekazu Murakawa and Yukio Ueda ............................................................ 337

Development of Finite Element Method for Seam Welding and Its Application to Optimization of Welding Condition
   Hidekazu Murakawa, Hiroyuki Minami and Toshihito Kato ................................................ 344

Evaluation of Three Dimensional Coordinate Measuring Methods for Production of Ship Hull Blocks
   Hideki Shimizu .................................................................................................................... 348

Virtual Manufacturing System based on Product Modeling Development of Computer-Aided Geometric Accuracy Management System for Steel Structures
   Shoji Takechi, Kazuhiro Aoyama and Toshiharu Nomoto .................................................. 352

Geometrical Accuracy Management of Very Large Floating Structures
   Yasuo Yamashita, Shunichi Kawachi, Shinzo Okada and Yoshitaka Kinoshita ....................... 360

TMCP STEEL

Fatigue Strength of Thermo-Mechanically Controlled Process Steel and It’s Weld Joint
   Hajime Kawano .................................................................................................................... 368

Mismatching and Transferability with Particular Reference to Fracture Strength of Welds
   Masao Toyoda .................................................................................................................... 376

Characteristics of TMCP Steels and Their Welded Joints Used for Hull Structures
   Masahiro Toyosada ............................................................................................................. 385

General Properties of TMCP Steels
   Shiro Imai ......................................................................................................................... 392
RELIABILITY, RISK AND SAFETY

Experimental and Numerical Studies of a Blast Loaded Cubic Structure  
L.A. Louca, J. Fris, P. Bailey, T.C. Rhodes, S. Chynoweth and L.C. Shirvill ................................. 397

Uncertainty Analysis in Fatigue Damages of Offshore Structures  
H. Karadeniz ..................................................................................................................................... 404

Method to Estimate Ship Longitudinal Ultimate Strength and Its Structural Reliability Using a Numerical Database  
Koji Masaoka and Hiro Okada ........................................................................................................ 412

Probabilistic Analysis and Design in Relation to Riser-Riser Collision  
Bernt J Leira, Tore Holmås and Kjell Herfjord............................................................................... 418

On Assessment of Existing Offshore Structures  
Gerhard Ersdal and Ivar Langen ..................................................................................................... 426

Nonlinear Dynamic Responses of a Large Offshore Structure with Uncertain Parameters  
Kenji Kawano and Tutomu Hashimoto ............................................................................................ 434

Reliability Analysis of Maximum Wind Force for Offshore Structure Design  
Jing-Jong Jang and Chiou-Shui Lee ................................................................................................ 442

A Field Modeling Approach to Predict Hot Gas Movement Induced by Marine Compartment Fires  
Changhong Hu and Nobuyoshi Fukuchi .......................................................................................... 450

MECHANICS AND ANALYSIS

Hydroelastic Response Analysis of a Large Underwater Shell of Revolution  
Kazutaka Toyota, Yukitaka Yasuzawa and Koji Kagawa ................................................................. 456

Considerations on Modelling of Stiffener in Buckling/Plastic Collapse Analysis of Stiffened Plating  
Sunil Mukherjee, Shigehiro Hayashi and Tetsuya Yao .................................................................. 464

A Study on The Optimization Method of Vibration Level for the New Standard of ISO6954  
Shigehiro Hayashi, Kazuhiro Sakakida, Kenichiro Terada and Tetsuya Yao ................................. 472

COLLISION, IMPACT AND DAMAGE

Effects of Strut Arrangements of a VLCC on the Oil Spill Prevention in Accidental Collision  
Tadashi Shibue, Akinori Abe and Kazuo Fujita ............................................................................... 480
