CONTENT

OFFSHORE INDUSTRY REVIEW

Natural Gas Demand and Transport Outlook - 2005
Clifford W. Petersen, Kevin Corbett, and Ron Bowen ................................................................. 1

Offshore Technology: a Heavy Industry Overview
Keh-Sik Min ................................................................................................................................... 6

North Sea Pipelines - Pushing the Technology Front
Jan Olav Berge .............................................................................................................................. 12

LNG Terminal Technology
Young-Tae Kho .............................................................................................................................. 18

ISOPE FIRST (2005) ADVANCED NATURAL GAS TRANSPORT SYMPOSIUM

Advances in High Strength Technology for Natural Gas Transmission
Andrew K Jenkins and Alan G Glover ............................................................................................. 24

A New Generation of Ultra-high Strength X100/120 Pipelines: A Breakthrough For Economic Longdistance Gas Transportation
Mauro Pontremoli ............................................................................................................................. 31

Towards X100 Gas Pipes Assessment Against Propagating Axial Crack Hazard
Gilles Perrin, Michaël Martinez, Pierre Odru, Trung T. Luu, André Pineau, Benoît Tanguy, and Jacques Besson ................................................................. 41

A New DME Production Technology 100tons/day DME Direct Synthesis Demonstration Plant Project
Osamu Inokoshi, Yotaro Ohno, Takashi Ogawa, Norio Inoue, and Nagayasu Takoeda .......... 49

Metal Dusting - Severe Problem in Operation of Syngas Generation for GTL Plant
Kunio Hirotani ................................................................................................................................... 54

Technical Advancements - VOTRANS Large-scale CNG Marine Transport
Charles N. White, Paul S. Britton, Yoshio Terada, Naoki Doi, and Masahiko Murata .......... 62

The Knutsen OAS Shipping Pressurized Natural Gas Carrier (PNG)
Per Lothe ........................................................................................................................................ 69
ABS Development of a Guide for Compressed Natural Gas Carriers
P. Rynn, H. Patel, and J. Gaughan................................................................................................76

Leading Technology for Next Generation of LNG Carriers
James Card and Hoseong Lee .................................................................83

Critical Design Issues of New Type and Large LNG Carriers
Sungkon Han, Joo-Ho Heo, and Sung-Geun Lee ........................................90

Pressurized LNG: A New Technology for Gas Commercialization

Metallurgical Design of Steel Plates with Advanced Cryogenic Properties for Fabrication of
Pressurized-LNG Containers

Pressurized LNG: Prototype Container Fabrication

OFFSHORE MECHANICS AND TECHNOLOGY

OFFSHORE MECHANICS: LNG, FPSO, VLFS, TLP AND SPAR

Positioning and Installing Simulation of LUN-A Platform for Sakhalin-2
G. V. Zhukov, S. L. Karlinsky, and M. V. Makarov .................................................................119

T-Shape Barge Design for Transportation and Mating of Sakhalin II Topsides
Byung Woo Kim, Mun Keun Ha, Chan Hu Park, Seung Hyuk Kim and Young Bok Kim .............125

Triceratops: an Effective Platform for Developing Oil and Gas Fields in Deep and Ultra
Deep Water
Charles N. White, Robert W. Copple and Cuneyt Capanoglu..................................................133

Stability Assessment of a Concrete Platform Under Ocean Tow
Erick T. Huang and J. Randolph Paulling....................................................................................140

Coupled Analysis of Deepwater Oil Offloading Buoy and Experimental Verification
Sangsoo Ryu, Arun S. Duggal, Caspar N. Heyl, and Yonghui Liu............................................148

Applications of Component based Spectral Fatigue Analysis System
Sungkon Han, Kyeong-Won Park, Tae-Woon Kang, and Joo-Ho Heo ......................................156

Modeling of Flow around FPSO Hull Sections Subject to Roll Motions: Effect of the
Separated Flow around Bilge Keels
Yi-Hsiang Yu, Spyros A. Kinnas, Vimal Vinayan, and Bharani K. Kacham ..............................163

Effects of Sway Motion on Reduction Performance of Anti-Rolling Tanks for FPSOs
Yoshiho IKEDA and Maho HARADA .......................................................................................171

A Numerical and Experimental Study on Motion and Wave Load Responses of Very Large
FPSO in Restricted Water Depth
Xie Yonghe and Li Runpei.................................................................................................176

A Dynamic Analysis of an Integrated Aircraft-Floating Structure-Water Interaction
System Excited by the Impact of an Aircraft Landing
J. T. Xing and J. Jin .................................................................................................................182
Experiment on Motion of Large Elastic Floater in Directional Seas  
Tetsuya Hiraishi, Mitsuhiro Okuno, and Ichiro Miyazato.................................190

Hydro-elastic Motions and Drift Forces of Very Large Mobile Offshore Structure in Waves  
Ken Takagi, Jun Noguchi and Takeshi Kinoshita........................................196

Effects of Sea-Bottom Topography on Hydroelastic Response of a Pontoon-Type VLFS  
Jo Hyun Kyoung, Byoung Wan Kim, Seok Kyu Cho, Sa Young Hong, Jin Ha Kim, and Young Shik Kim.................................................................203

Investigation of the Effect of Stiffness Distribution and Structure Shape on Hydroelastic Responses of Very Large Floating Structures  
Byoung Wan Kim, Jo Hyun Kyoung, Sa Young Hong and Seok Kyu Cho.............210

Nonlinear Dynamic Response of Floating Circular Cylinder with Taut Tether  
Xiaohui Zeng, Xiaopeng Shen, and Yingxiang Wu...........................................218

An Experimental Study on the Extreme Motion Responses of a SPAR Platform in the Heave Resonant Waves  
Yong-Pyo Hong, Dong-Yeon Lee, Yong-Ho Choi, Sam-Kwon Hong and Se-Eun Kim .......... 225

An Experimental Study on Motion Characteristics of Cell Spar Platform  
Seung J. Lim, Jun B. Rho, and Hang S. Choi ..................................................233

Structural Safety Verification for Kizomba-B Extended Tension Leg Platform  
Seock-Hee Jun, Chun-Sik Shim, Hag-Sung Kim, Gi-Yun Lee, Joong-Kyoo Kang and Joo-Ho Heo .................................................................238

Surge Motion of Mini TLP in Random Seas- Comparison between Experiment and Theory  
Nungsoo Kim and Cheung Hun Kim.................................................................244

A Feasibility Study for Mini Tension Leg Platform Based on Motion Characteristics in Waves  
D.H. Kang ...........................................................................................................252

OFFSHORE MECHANICS: SUBSEA AND OFFSHORE SYSTEMS AND FIXED STRUCTURES

Development of Risk-based Information Systems for Management of Sunken Ships  
Hyuek-Jin Choi, Hongtae Kim, Seung-Hyun Lee, Chang-Gu Kang, and Jae-Moon Lew ......... 260

Initial Design of Offshore Floating Marina System  

Automatic Bottom Detection and Horizontal Distance Correction of the High-resolution Marine Seismic Profile  
Jin-Hoo Kim and Hyun-Do Kim ...........................................................................273

Experimental Study of Hydrocyclonic Separation under Cyclic Flow Condition  
Lixin Zhao, and Minghu Jiang...........................................................................278

Effects of Current Induced Static Response on Total Response of Offshore Structures Subjected to Wave and Current  
Tomoyo Taniguchi and Kenji Kawano ..................................................................283

Scour around Spud Cans - Aanalysis of Field Measurements  
Daniel Rudolph, Arnout C. Bijlsma, Klaas Jan Bos, and Klaas Rietema...................289
Torsionally Coupled Response Control of Offshore Platform Structures Using CTLCD  
Linsheng Huo and Hongnan Li.................................................................296

LNG AND TERMINAL

Expansion of Pyeongtaek LNG Receiving Terminal of Korea Gas Corporation  
Youngsoon Sohn, Youngmyung Yang, Insoo Yoon, Sunghee Choi and Gunhyung Choi............304

An Initial Study for the Development of a Smart Health Monitoring System for Insulation Panels of LNG Carriers  
Myung Hyun Kim, Do Hyung Kim, Sung Won Kang, Young Joo Son, Jae Myung Lee, Byung Jae Noh, and Young Woo Lee........................................................................................................309

Numerical Simulation on Ship to Ship Transfer Operation in Rough Sea  
Yoshiyuki Inoue and Md. Kamruzzaman .................................................................................316

GAS HYDRATES

PLENARY PRESENTATION

Methane Hydrates R&D in Japan: Progress in MH21 National Project  
Takeshi Komai ......................................................................................................................324

Tuning the Composition of Clathrate Hydrates: the Fundamental Study for Application to Gas Storage  
Yu-Taek Seo, Do-Youn Kim, Jong-Won Lee, Jea-Sung Park, and Huen Lee ..........................329

Preliminary Study on Safety Requirements for Natural Gas Hydrate Pellet Carriers  
Susumu Ota, Toshiro Arima, Hirofumi Takano, Kazushi Hirai, Misao Kamei and Hideyuki Shirota..........................................................................................................................333

Measurement of Thermal Conductivity of Hydrate Sediment Sample  
Yoshitaka Yamamoto, Taro Kawamura, Michica Ohtake, Takeshi Komai, Fumio Nakagawa, Tomoya Tsuji, and Yuichi Tsukada........................................................................................................341

Dissociation Experiment of Hydrate Core Sample using Thermodynamic Inhibitors.  
Kawamura, T., Yamamoto, Y., Ohtake M., Sakamoto, Y., Komai, T. and Haneda, H. ....346

A Dissociation Behavior of Methane Hydrate-Bearing Sediment Using High-speed X-ray CT Scanner  
Yasushi Kamata, Mitsutaka Sato, Shinji Ono, Takao Ebinuma, Jiro Nagao, Hideki Minagawa, Ryo Omura and Hideo Narita..................................................................................................................351

Behavior of Gas Hydrate Formation in Marine Sediments for CO₂ Sequestration  

Transformation of Methane Hydrate to Carbon Dioxide Hydrate: In Situ Raman Spectroscopic Observations  
Ji-Ho Yoon, Taro Kawamura, Yoshitaka Yamamoto, and Takeshi Komai..............................360

Effects of Methane Hydrate Formation on Shear Strength of Synthetic Methane Hydrate Sediments  
Akira Masui, Hironori Haneda, Yuji Ogata and Kazuo Aoki.....................................................364
Laboratory Experiments to Investigate Hydrate Destabilization
Kana Kuroda, Stephen M. Masutani and Gérard C. Nihous ................................. 370

Catalytic and Adsorption Techniques for Gas Hydrates Development
Maxim S. Mel'gunov, Vladimir B. Fenelonov, and Valentin N. Parmon ...................... 374

Numerical Simulation of Laboratory Experiments on Methane Hydrate Dissociation
Rajesh J. Pawar, George A. Zyvoloski, Norio Tenma, Ysuhide Sakamoto and Takeshi Komai... 379

Field Scale Simulation for Effect of Permeability Distribution and Anisotropy on
Dissociation and Gas Production Behavior in Marine Sediments with Gas Hydrate
Y. Sakamoto, T. Komai, T. Kawamura, N. Tenma, and T. Yamaguchi ............................ 386

DEEP-OCEANOCEAN MINING

Polymetallic Nodules Processing in Interoceanmetal. the Present and the Future
František Vranka and Ryszard Kotliński ........................................................................ 392

The Effect of High-Power Electromagnetic Pulses on Physicochemical Properties of Sulfide
Minerals and Gold-Containing Beneficiation Products
V. A. Chanturiya, I. J. Bunin and A. T. Kovalev ......................................................... 398

Sensitivity Analyses for Development of Manganese Nodules and Cobalt-Rich Manganese
Crusts
S.-H. Park and T. Yamazaki ............................................................................................... 406

Behavior of Discharged Water from Ocean Nutrient Enhancer "TAKUMI"
Akiyoshi Bando, Shunji Sakurazawa, Masayuki Umeki, Kazuyuki Ouchi, and Yasuyuki
Ikegami ................................................................................................................................ 411

On-land Hydraulic Pumping Experiments of 30-meter Height Scale
Chi-Ho Yoon, Dong-Kil Lee, Yong-Chan Park and Seok-ki Kwon .................................... 417

Experimental Study on Effects of Pipe Inclination in Airlift Water Pumping
Sup Hong, Jong-Su Choi and Seok Won Hong ............................................................... 421

Design of Decentralized Controller for Deep Seabed Mining System
Tae-Kyeong YEU, Sup HONG, Hyung-Woo KIM and Jong-Su CHOI ............................... 426

OCEAN AND OFFSHORE WIND ENERGY

Design of Monopile Foundations for Large Offshore Windturbines – Experiences from the
First Projects Offshore the British Coast
Nils Fog Gjersøe and Carsten Brendstrup ......................................................................... 433

Evaluation of Different Damage Prediction Methods for Support Structures of Offshore
Wind Energy Converters
Patric Kleineidam and Peter Schaumann ......................................................................... 441

Certification of Offshore Wind Farms
M. Klose and P. Dalhoff .................................................................................................... 449
Intelligent Wind Turbine Generator with Tandem Rotors Applicable to Offshore Wind Farm  
Toshiaki Kanemoto, Ahmed Mohamed Galal, Yuji Inada, and Yuko Konno ........................................... 457

Applications of Long Distance HVDC- / AC Cable Transmission Systems for Grid Access to Remote Offshore Oil & Gas / Windpark Installations  
Norbert Christl and Michael G. Weinhold ............................................................................................. 463

Dynamic Behavior of Novel Vertical Axis Tidal Current Turbine: Numerical and Experimental Investigations  
D.P. Coiro, F. Nicolosi, A. De Marco, S. Melone, and F. Montella ......................................................... 469

Optimal Damping Profiles for a Heaving Buoy Wave Energy Converter  

Investigation of Seasonal Variation of Wave Energy Density around Jeju Sea based on Long-Term Simulated Wave Data  
Keyyong Hong, Seung-Ho Shin, Seok-Won Hong and Hwangjin Ryu ................................................. 485

Experimental Study on Wave Overtopping Discharge in Sloping Structures for Wave Energy Converter  
Seung-Ho Shin and Keyyong Hong ........................................................................................................ 491

Design of a Stand-alone Wave Energy Plant  
S.Muthukumar, R.Desai, V.Jayashankar, S.Santhakumar and T.Setoguchi ............................................ 497

A Proposal for Energy Extracting Float  
Kesayoshi Hadano, Pallav Koirala and Makoto Watanabe .................................................................. 503

Design of Impulse Turbine with an End Plate for Wave Energy Conversion  
B.-S. HYUN, J.-S. MOON, S.W. HONG and K.S. KIM ............................................................... 507

Effect of Tip Clearance on the Performance of Impulse Turbine for Wave Energy Conversion  
Tae-Whan Kim, Manabu Takao, Toshiaki Setoguchi and Kenji Kaneko ............................................. 513

Performance of Radial Turbine with Pitch-Controlled Guide Vanes for Wave Energy Conversion  
Manabu Takao, Yoshihiro Fujioka, Tae-Whan Kim and Toshiaki Setoguchi ......................................... 518

Hysteretic Characteristics of Biplane Wells Turbine in a Deep Stall Condition  
M. Mamun, Y. Kinoue, T. Setoguchi, K. Kaneko and Y. W. Lee ......................................................... 523

Characteristics of Floating Type Wave Power Generating System with Oscillating Water Column  
Masami Suzuki, Yukihisa Washio and Toshiari Kuboki .................................................................... 529

Numerical Study on the Wave Power Absorbed by a Floating BBDB Wave Energy Device  
Do Chun Hong, Sa Young Hong and Seok Won Hong ........................................................................ 537

Comparison of Numerical Dynamic Pressure Inside a Pneumatic Chamber of an OWC Device with Measured Dynamic Pressure by Model Experiments  
Seok Won Hong, Do-Chun Hong, Sa-Young Hong, Jin-Ha Kim, Hark Sun Choi and Jae Moon Lew .............................................................................................................................. 542

Technical Manual for Oscillating Water Column Type Wave Power Device  
Hiroyuki Osawa and Tsuyoshi Miyazaki ............................................................................................... 549
Oceanic Observation and Investigation for Utilization of Ocean Energy in the Fiji
Yasuyuki Ikegami, Kazuya Urata, Akiyoshi Bando, Takaaki Wajima, Keisuke Ohto, Tsutomu Nakaoka, Kiyouharu Tabuchi and Tadashi Kamano........................................................................................................557

Effect of Regenerator Heat Transfer Performance on the Cycle Thermal Efficiency of
OTEC using Ammonia – Water as Working Fluid
Yasuyuki Ikegami, Takeshi Yasunaga and Haruo Uehara .............................................................563

OCEAN AND POLAR ENVIRONMENT, REMOTE SENSING AND NUMERICAL MODELING

A Concept of Harmonized Transportation System for Supporting the Recycle-based Society
Takeshi SHINODA, Nobuyoshi FUKUCHI, Fumiko REIKAN, Keisuke FUKUHARA and Hwayoung KIM..........................................................................................................................567

Environmental Impact Assessment for Large-Scale DOW Utilization
Koji Otsuka, Tomoji Ikeda and Masatoshi Hayashi ........................................................................575

Estimation Method for Vertical Distribution of Phytoplankton at the Western Equatorial Pacific Ocean
Naoki NAKATANI, Takuhei SHIOZAKI and Taketoshi OKUNO ..................................................................................582

Field Surveys of Transport Processes in the Kitan Strait Connecting Osaka Bay and the Pacific Ocean
Han-Gu Kim, Shuzo Nishida and Keiji Nakatsuji..................................................................................590

On Examination of the Detection Method of Leakage Oil from Sunken Ship and Quantity of the Remained Oil Using Ultrasonic Wave
Kunihiro HOSHINO, Michio SHIMADA, Shoichi HARA, Kazuo HITOMI, Michihiro KAMEYAMA, Hiroshi YAMANOUCHI, Obuo KIRIYA, Toshifumi Hori, Masahiko SASANO, Kenjiro HIKIDA, Naoki NIIDA and Mashiro TAKEI ..................................................................................596

The Risk of Oil Spillage at Mirfa Power and Desalination Plant
Khaled A. Mohamed, M.Odeh and Ahmed Areiqat ..............................................................................604

Treatment of ASP Produced Water with Hydrophilic Fibre Ball Filtration
Shumeng Liu, Xigui Dong, Xuefeng Zhao, Zhenjia Zhang and Wei Du ................................................612

Application of a Genetic Algorithm to the Design of Groundwater Monitoring Well Networks under Conditions of Uncertainty
K. Inoue, T. Tanaka and I. Masaki ..........................................................................................................617

Environmental Investigations at the Seafloor Using Optical and Acoustic Sensors on bottom landers

OFFSHORE AND ARCTIC PIPELINES, RISERS AND CABLE MECHANICS

OFFSHORE AND ARCTIC PIPELINES
Commissioning 8000 km of subsea pipelines
Christian Falck and Jarleiv Maribu ......................................................... 1

Ormen Lange Pipelines - A Step Further
Asbjørn Wilhelmsen, Hilde Meisingset, Simen Moxnes and Hans Olav Knagenhjelm ................. 8

Ormen Lange Pipelines Routing and Cost-effective Seabed Preparation
Ole Magnus Holden, Gunnar Paulsen, Petter Bryn and Tom Martthinsen.............................. 16

Hydrate Prevention on Long Pipelines by Direct Electrical Heating
Atle Lenes, Jens Kristian Lervik, Harald Kulbotten, Arne Nysveen and Atle Harald Børnes...... 24

The Influence of the Reeling Installation Method on the Integrity of Circumferential Welds in Tight Fit Pipe
E.S. Focke, J. van Oosten, J. Meek, A. Romeijn and H. Nakasugi ........................................... 31

Pipeline Expansion on Uneven Seabed
Tore Soreide, Stig Olav Kvarme and Gunnar Paulsen ........................................................... 38

High Voltage Cable Design for Direct Electrical Heating of Very Long Flowlines
Sverre Hvidsten, Are Bruaset, Kjell Olafsen, Liv Lundegaard and Atle H Børnes ....................... 44

Experimental and Theoretical Investigations of Multiphase Twin Screw Pumps for New Offshore Applications
T. Rausch, Th. Vauth, M. Reichwage and D. Mewes ................................................................. 49

Special Features of Frost Heave of a Buried Chilled Gas Pipeline
Grechishchev, S E, Magomedgadzhieva, M A, and Dmitrieva, S P ........................................... 57

Problems of Probabilistic Simulation of an Underwater Pipeline Track under Impact of Drifting Hummocks Offshore Sakhalin Island
Alexander T. Bekker, Olga A. Sabodash and Pavel A. Truskov .................................................. 62

Elasto-plastic Bearing Behavior of Steel Pipes Exposed to Internal Pressure and Bending
Peter Schaumann, Christian Keindorf and Henning Brüggemann ........................................... 69

Experimental Research on Local Buckling Behaviour of Tight Fit Pipe
E.S. Focke, A.M. Gresnigt, J. Meek and H. Nakasugi ............................................................... 76
Displacement Control in Lateral Buckling of "Short" Pipelines
Lars Christensen ............................................................................................................................84

Analytical Linear Elastic Analysis of Lateral Buckling of "Short" Pipelines
Lars Christensen ............................................................................................................................93

Numerical Analysis on Pipeline Laying for Intake Deep Ocean Water
D.H. Jung, H.J. Kim and H.I. Park.................................................................................................103

Wave-Induced Pipeline On-bottom Stability: Comparisons between Pipe -Soil and Wave-
Pipe -Soil Interaction Models
Fuping Gao, Yingxiang Wu, Dong-Sheng Jeng and Xu Jia...........................................................109

Pipeline-Soil Interaction Analysis for Horizontal Cyclic Loading of Pipeline
Tomiya Takatani ............................................................................................................................115

Analysis of Flow and Structure Interactions on a Floating Body with a 3D-PTV and a
Motion Tracking Technique
Deog Hee Doh, Hyo Jae Jo, Tae Gyu Hwang, Joo Ho Choi, Kyung Rae Cho, Kenji Tanaka
and Masahiro Takei.......................................................................................................................123

Vortex-induced Vibration Model of Span Segment of Buried Submarine Pipeline
Jing-Zhong XING, Chun-Tu LIU and Meng-Lan DUAN...............................................................130

RISERS, MOORING AND CABLE MECHANICS
Experimental Study and Numerical Analysis on Free Spanning Submarine Pipeline under
Dynamic Excitation
Jing Zhou, Xin Li and Rubo Dong .................................................................................................135

Vortex-induced Vibrations of Submarine Free-span Pipelines Using Turbulent Flow Model
Simulation
Guoxing Wang, Bingchen Liang and Huajun Li.............................................................................141

An Experimental and Numerical Study on Vortex Induced Vibrations of a Long Flexible
Riser Undergoing Irregular Motion at its Top End
Hidetaka Senga and Wataru Koterayama .....................................................................................148

Highly Efficient Modal Analysis Method Based on Limited Number of Sensors
Igor Prislin ........................................................................................................................................155

Command and Control of Subsea Well Completions by means of Acoustic Communications
Dale Green ........................................................................................................................................161

Flexible Riser Fatigue Design and Testing
Carlos Alberto Duarte de Lemos and Murilo Augusto Vaz ...........................................................166

Nonlinear Analysis of Seabed Interaction and Mooring Cable Dynamics with A Finite
Element Approach
Long Yu and Jiahua Tan ..................................................................................................................173

On the Mooring Line Tension of the Tanker by Dolphin Mooring in Wind and Waves
Shoichi Hara, Katsuji Tanizawa, Kunihiro Hoshino, Toshyuki Kano and Kenji Yamakawa......179

Comparisons on the Mooring Line Force and Cage Motion Characteristics of Gravity and
Sea Station Cages
Yucheng Li, Fukun Gui and Fang Song..........................................................................................187
Selection Procedure for Optimal Size of Mooring Buoy Chain by Introduction of Elastic Type Chain
Katsumasa Tokubuchi and Tomotsuka Takayama ................................................................. 194

FLOW-INDUCED VIBRATIONS

Simulation of High Reynolds Number Flow past Arrays of Circular Cylinders Undergoing Vortex-induced Vibrations
J.P. Pontaza, C.R. Chen and H.C. Chen ................................................................................. 201

Experimental Study of Vortex Induced Vibration of an Elastically Mounted Sphere in a Pipe
L. Grinis, U. Tzadka and Yu.M. Krakovskii.............................................................................. 208

Cable Vibration Considering Internal Friction
Xin Liu and R.H. Knapp ........................................................................................................... 213

Vortex-Induced Vibration of a Circular Pile in Slowly Fluctuating Tidal Current
Fumiaki Nagao, Minoru Noda, Eiichi Arima and Hidehiko Utsunomiya .................................. 220

Riser Interference and VIV Amplification in Tandem Configuration
E. Fontaine, J.P. Morel, Y.M. Scolan and T. Rippol ................................................................. 226

DEEP OCEAN ROV, AUV AND COMMUNICATION

The Development and Sea Trial of KAIKO7000

A Study on the Pressure Vessel Design, Structural Analysis and Pressure Test of a 6,000 m Depth-rated Unmanned Underwater Vehicle
Tae-Hwan Joung, In-Sik Nho, Chong-Moo Lee, Pan-Mook Lee, Seung-Il Yang, Seok-Won Hong, Taro Aoki, Tadahiro Hyakudome, Il-Gyu Kang, Gyeong-Hwan Yoon, Young-Rok Kim and Sang-Chul Han ................................................................................................................................. 240

Deep-Sea Cruising AUV "URASHIMA" - Challenge to the Record for the Autonomous Navigation -
Shojiro Ishibashi, Taro Aoki, Ikuo Yamamoto, Satoshi Tsukioka, Hiroshi Yoshida, Tadahiro Hyakudome, Takao Sawa, Tetsuya Inada, Akihisa Ishikawa, Kiroshi Hirokawa, Kazuhisa Yokoyama and Toshihisa Tani ................................................................................................................................. 246

Prospective Deep Sea Detailed Survey with the AUV "Urashima"
Satoshi Tsukioka, Taro Aoki, Ikuo Yamamoto, Hiroshi Yoshida, Tadahiro Hyakudome, Shojiro Ishibashi, Takao Sawa, Akihisa Ishikawa, Tetsuya Inada and Kiyoshi Hirokawa .......... 252

A Novel Approach To Online Underwater Path Planning With Particle Simulation System
Alexander M. Nip and Song K. Choi .......................................................................................... 259

An Integrated Navigation System for Underwater Vehicles with Range Measurement

Edited by:
Jin S. Chung, ISOPE, Cupertino, California, USA
Alastair D. Jenkins, University of Bergen, Bergen, Norway
Masashi Kashiwagi, Kyushu University, Kasuga, Japan

Presented at:
The Fifteenth (2005) International Offshore and Polar Engineering Conference held in Seoul, Korea,
June 19–24, 2005

Organized by:
International Society of Offshore and Polar Engineers

Sponsored by:
International Society of Offshore and Polar Engineers (ISOPE) with cooperating societies and associations

The publisher and the editors of its publications assume no responsibility for the statements or opinions expressed in papers or presentations by the contributors to this conference or proceedings.
CONTENT

HYDRODYNAMICS

EXTREME WAVES

Extreme Wave Generation in Laboratory Wave Tank

Creation and Annihilation of Extremely Steep Transient Wave
Igor Ten and Hiroshi Tomita

On a New Formulation of Bichromatic Nonlinear Wave Profiles and Its Numerical Study
T. S. Jang, S. H. Kwon and C. H. Kim

Wave Energy Focusing in a Three-dimensional Numerical Wave Tank
C. Fochesato, F. Dias and S. Grilli

Diffraction Effects in a Phase-Averaged Wave Model
Guan-Yu Chen and Heng-Wen Chang

Numerical Estimations of Wave Reflection Coefficients for Irregular Waves Over Submerged Obstacles
Ruey-syan Shih, Chung-ren Chou and John. Z. Yim

BEM AND SEAKEEPING

Application of the Accelerated Desingularized BEM in Water Wave Problems
Dezhi Ning, Bin Teng and Baolei Geng

Wave Potential In Representation of 3D Flow About A Ship Advancing Through Regular Waves In Deep Water
Francis Noblesse and Chi Yang

Dispersion Curves For Diffraction-Radiation By A Ship Advancing Through Regular Waves In Finite Water Depth
Francis Noblesse, Rommel Espinosa, Chi Yang and Rainald Löhner

Some aspects of multibody interactions in seakeeping
S. Malenica, J.M. Orozco and X.B. Chen

Scale Effects in Wave Run-up Experiments
Fiona Paterson, Krish P Thiagarajan and Michael T Morris-Thomas

New Estimation Method of Wind Forces Acting on Ships on the Basis of Mathematical Model
Toshifumi Fujiwara and Tadashi Nimura
Bow-Wave Height and Location
Francis Noblesse, Dane Hendrix, Lisa Faul and Jonathan Slutsky .................................................. 90

DESIGN WAVES

Wave Climate in the Northeast of Taiwan
John Z. Yim, Chung-Ren Chou and Wei-Po Huang .......................................................................... 96

Waves and Climate Change in the Sea of the Hebrides
Judith Wolf and David K. Woolf ........................................................................................................ 100

Statistical Characteristics of Winds and Waves around Japan
Masaru Tsujimtoto and Shigesuke Ishida .......................................................................................... 108

Fetch-Limited Growth of Wind Waves in Deep Water
Changlong Guan, Shufang Zhang and Jian Sun ................................................................................ 116

NONLINEAR WAVES

Numerical Modeling of Nonlinear Surface Waves Caused by Surface Effect Ships
Dynamics and Kinematics
Hong Gun Sung and Stephan T. Grilli ............................................................................................... 124

Time-domain Prediction of Nonlinear Motions and Loads of Body in Large Waves Using a High Order Panel Method
Kun Qian and Yanying Wang .......................................................................................................... 132

Application of B-Spline Based Higher-Order Panel Method to Inviscid Flow Problem
Chang-Sup Lee, Gun-Do Kim and Hyun Yup Lee ................................................................................. 138

A Novel Method for Power Flow Design and Control Based on Power Flow Mode Theory
Y. P. Xiong, J. T. Xing and W. G. Price ............................................................................................. 146

System Identification of Offshore Structures using Empirical Mode Decomposition
Nadathur Varadarajan and Satish Nagarajaiah .................................................................................. 154

COMPUTATIONAL FLUID DYNAMICS (CFD)

Numerical Simulation of the Vortical Flow around an Oscillating Circular Cylinder
Kwang-Soo Kim, Seung-Jae Lee and Jung-Chun Suh......................................................................... 162

Evaluation of Vertical Plane Dynamic Stability by CFD
Sukwon Lee, Eunsuk Jin and Hyeok Lee ............................................................................................. 168

Development of a High Performance Cavitation-Free Rudder System
Shin Hyung Rhee and Hyochul Kim .................................................................................................. 173

Numerical Simulation of Turbulent Free Surface Flow around a Self-Propelled Ship
Jin Kim, Il-Ryong Park, Kwang-Soo Kim and Suak-Ho Van .............................................................. 180

Computation of 3D Flows with Violent Free Surface Motion
Chi Yang and Rainald Löhner ............................................................................................................. 187

Internal Flow Analysis of FPU Oil Separator Considering Six Degrees-of-Freedom Ship Movement
Effects of Density Stratification on Turbulence Structures and Turbulent Heat Transfer Mechanism in Turbulent Open-channel Flows
Ryuichi Nagaosa, Lars-Inge Enstad and Guttorm Alendal ........................................................... 201

LNG, SLOSHING AND IMPACT
Three-dimensional Sloshing Analysis of LNG Carriers in Irregular Waves
Jong Jin Park, Mun Sung Kim and Mun Keun Ha ................................................................. 209

A 3D Numerical Method for Assessment of Impact Loads due to Sloshing in Liquid Cargo Tanks
Liang-Yee Cheng and Makoto Arai ............................................................................................... 214

Prediction of Sloshing Load in Irregular Seaways by a Numerical Simulation Method
Humberto S. Makiyama and Makoto Arai ................................................................................. 222

A Parametric and Numerical Study on LNG-tank Sloshing Loads

Experimental Study on Sloshing for Large LNGC Design

Capture of Air Cushion Effects in a Wedge Water Entry SPH Simulation
G. Oger, B. Alessandrini and P. Ferrant....................................................................................... 241

Validation of a Numerical Code by a Particle Method for Violent Free Surface Problems
Sueyoshi Makoto ............................................................................................................................ 247

Sensitivity Study on Computational Parameters for the Prediction of Slosh-Induced Impact Pressures
Yonghwan Kim, Jungmoo Lee, Young-Bum Lee and Yong-Soo Kim............................................. 254

Numerical Simulation for the Rising Process of a Large Scale Air Bubble
Shaowu Li and Xiaoyun Huang ..................................................................................................... 262

Numerical Model of Three-Dimensional Multiphase Flow Using CIP and Extended SMAC Methods
Koji Kawasaki ................................................................................................................................ 267

Numerical Simulation of Violent Sloshing by CIP Method with Experimental Validation
Zdravko R. Kishev, Changhong Hu and Masashi Kashiwagi........................................................ 274

Sloshing-Ship Motion Coupling Effect for the Sloshing Impact Load on the LNG Containment System
Jang W. Kim, Kunho Kim, Peter S. Kim and Yung S. Shin............................................................ 282

REMOTE SENSING
GPS Buoy and Seabed Installed Wave Gauge Application to Offshore Tsunami Observation
Toshihiko Nagai, Shigeru Satomi, Yukihiro Terada, Teruyuki Kato, Kyoshi Nukada and Masanobu Kudaka ........................................................................................................................................... 292

Evaluation of Operational Man-Machine Mix Regional Wave Forecasting System — the Role of In-Situ Wave Predictors
Beng-Chun Lee, Ming-Yang Liao, Hwa Chien, Pei-Hung Chen and Ming-Da Chiou.................... 300
Surface Waves and Atmospheric Near-surface Layer Variability above Features of Bottom Topography
Victor V. Bakhanov, Irina A. Repina, Aleksandr V. Sidorov, Victor I. Titov, Yuliya I. Troitskaya and Emma M. Zuikova

Optimal Mapping for Artificial Reef Facility using Remote Sensing and GIS
Jong-Kyu Kim and Jung-Hyun Kim

DYNAMICS AND FORCES

Design Evaluation in the Aspects of Hydrodynamics on a Prototype Semi-Submersible with Rectangular Cross-Section Members
Yongwon Lee, Atilla Incecik, Hoi-Sang Chan and Zhoongkeun Kim

Identification of Hydrodynamic Coefficients for Foundation Piles
M.J. Perry and P. C. Sandvik

Numerical and Experimental Study of Wave Characteristics around Vertical Cylinder
Yong S. Shin, Chul H. Jo, and Ro S. Park

Estimation of Current Loads on Offshore Vessels
Rae H. Yuck, Sa Y. Hong and Hang S. Choi

Karl E. Kaasen, Frank Andersson, Erik Lehn and Claes W. Olsen

Fishtailing Instabilities in Emergency Towing of Disabled Tankers
Kamlesh S. Varyani, Nigel D.P. Barltrop and Xuan P. Pham

Wave-Induced Motions of a Body Floating in a Two-Layer Fluid
Masashi Kashiwagi

Long-term Response of a Heavy Lift Barge
Lindsay C. McDougall, John A. MacSween, Purnendu K. Das, Kamlesh S. Varyani and Amrit Nair

Ship Motion Analyses in Compact Wave Basin with Absorbing Wave Maker
Shigeru Naito, Munehiko Minour, Muneenobu Takeda and Etsuro Okuyama

Viscous Damping of Vessels Moored in Close Proximity of Another Object
Gerrit de Boer and Bas Buchner

Heave, Roll and Pitch Damping of a Deepwater CALM Buoy with a Skirt
Hans Cozijn, Ries Uittenbogaard and Erik ter Brake

Motion response of a spread moored barge over a sloping bottom
P. Teigen

Development of Automatic Position Adjustable Elevator for Workboat
Masahiko Nakamura and Hiroyuki Kajiwara

Hybrid Coupled and Uncoupled Methodologies for Floating Systems Motion Analysis
Stael Ferreira Senra, Márcio Martins Mourelle, Ana Lúcia Fernandes Lima Torres and Breno Pinheiro Jacob
METOCEAN

The Statistical Distribution of a Nonlinear Ocean Surface
Jingdong Liu, Harald E. Krogstad, Karsten Trulsen, Kristian Dysthe and Herve Socquet-Juglard ................................................................. 422

On the Effect of Wind and Turbulence on Ocean Swell
Fabrice Ardhuin and Alastair D. Jenkins ........................................................................................................ 429

Combined Return Values Estimation of Wind Velocity and Wave Height with Poisson Bivariate Log-Normal Distribution
Sheng Dong, Yakun Liu and Yong Wei ........................................................................................................ 435

COASTAL ENGINEERING

TYPHOON AND STORM SURGE

The Coastal Hazards Warning System Based on the Operational Wave and Storm Surge Models
Sun-Pei Yeh, Beng Chun Lee, Dong-Jiing Doong, Chwen-Ling Kuo and Chia Chuen Kao .......... 440

Hindcasting of Storm Surges in Korea by Typhoon 0314 (Maemi)
Hiroyasu Kawai, Do-Sam Kim, Yoon-Koo Kang, Takashi Tomita and Tetsuya Hiraishi ....... 446

An Application of Numerical Simulation and Correlation Method to Calculate Storm Surge Elevations with Certain Return Years
Xiuqin Wang, Tong Yan and Qiuliang Hu ............................................................................................. 454

Response of Narugashima Beach to Severe Storm Caused by Typhoon No.10 2003
Tsuyoshi Arimitsu and Zhang Yongzhan ............................................................................................. 459

Characteristics of the Storm Surge and High Waves in Coastal Area of the Southeast Korea During the Typhoon Maemi

Mitigation of Abnormally High Storm Surge at Tosa Bay with Construction of Breakwaters
Hidenori Shibaki, Jong-In Kim and Hayato Tanabe ............................................................................. 472

TSUNAMI AND WAVES

An Enhanced Fully Nonlinear Surf zone Wave Model
Xiaozhou Ma, Guohai Dong and Bin Teng ............................................................................................ 480

Experimental Study on Multi-Directional Wave Focusing and Breaking in Shallow Water
Shuxue Liu, Jinxuan Li, Keyyong Hong and Eustorgio Meza .................................................................. 486

Effects of Currents on Wave Transformations
Ming-Chung Lin, Chao-Min Hsu and Chao-Lung Ting ......................................................................... 493

Analysis of Diffraction-radiation Problem by the Meshless Method
Jeongwoo Lee and Woncheol Cho ........................................................................................................ 500

The Depth Effect on Transverse Waves
Li-Mei Deng and Allen T. Chwang ........................................................................................................ 508

CURRENT, TIDE AND SEDIMENT

Temporal Variability of Residual Current at the Head of Ariake Bay
   Takaharu Hamada and Yusaku Kyozuka ...................................................................... 680

Characterisation of Subsurface Jet Currents Offshore West Africa
   Gus Jeans and Cortis Cooper ....................................................................................... 688

Ocean Circulation at Yokogan-sone Seamount
   Masamichi OIKAWA, Yusaku KYOZUKA, Nobuhiro YAMAWAKI, Hiroshi YOSHIMURA, Yasuhiro MORII and Akira MURAO ................................................................. 694

Formation and Development of Gravity Current Advancing in a Long Channel
   Tetsuo Katsuragi, Nobuhiro Baba and Ken-ichi Kitaura ............................................... 702

Decrease in Tide and Tidal Current in the Ariake Bay
   Yusaku Kyozuka, Takamichi Fujiwara and Takaharu Hamada .................................. 707

The Response of Tidal Wave and Engineering Water Level to Long-Term Sea Level Variation in the Jiaozhou Bay
   L.Du, J.C. Zuo, L. Li and P.L. Li .................................................................................. 713
Basic Research on Operational Troubles for Ships and Harbours Due to Abnormal Water Levels  
Kenji SASA, Shinji MIZUI, Toshihiko NAGAI and Tadashi HIBINO............................................720

A New Criterion to Design the Pennants on an Artificial Beach after Nourishment Referring to Wave Climate  
Angela Celeste Taramasso, Barbara Grosso and Paola Passalacqua.............................................728

Relative Importance of Tides and Waves for Sediment Transport on the Intertidal Mudflats  
Makoto Nakamichi, Masami Tsuchida, Takahiro Nishi, Takaomi Hokamura and Fumihiko Yamada ..........................................................................................................................................732
ISOPE THIRD (2005) HIGH-PERFORMANCE MATERIALS SYMPOSIUM:
ADVANCED WELDING

FRICITION STIR WELDING

Friction Stir Welding of Steel T-joint Configurations
Russell J. Steel, Tracy W. Nelson, Carl D. Sorensen, and Scott M. Packer ........................................... 1

Microstructure and Mechanical Properties of Friction Stir Welded 430 Stainless Steel
Seung Hwan C. Park, Toshihide Kumagai, Yutaka S. Sato Hiroki Kokawa, Kazutaka Okamoto, Satoshi Hirano and Masahisa Inagaki ................................................................. 6

Properties and Microstructure of Friction Stir Welded Inconel Alloy 600
Yutaka S. Sato, Pisuit Arkom, Seung Hwan C. Park, Hiroyuki Kokawa, Tracy W. Nelson and Russell J. Steel ......................................................................................................................... 13

Development of FSW Process for Steel Assemble to Shipbuilding and Offshore Structure
Takeshi SHINOUDA, Hiroyuki TAKEGAMI, Manabu HIRAKAWA and Hikaru YAMAMOTO ...... 18

Mechanical Properties of Friction Stir Welds of Ultrafine Grained Steel and Other Materials
Hidetoshi Fujii, Ling Cui, Nobuhiro Tsuji, Rintaro Ueji, Kazuhiro Nakata and Kiyoshi Nogi .... 22

Metallography of Dissimilar Fe-Ni Joint by Friction Stir Welding
HyunWoo Jin, Raghavan Ayer, Russel Mueller, Shiun Ling and Steve Ford ................................. 27

Tool Geometries and Process Parameters Required to Friction Stir Weld High Melting Temperature Materials
Scott M. Packer, Tracy W. Nelson, Russell J. Steel and Murray Mahoney ........................................... 32

Welding Properties between 6063 Aluminum and S45C Steel by Friction Stir
Toshiaki YASUI, Youichirou SHIMODA, Masami TSUBAKI and Masahiro FUKUMOTO ....... 39

Measurement of Quantity of Heat in Friction Welding
Y. Isshiki, H. Yamaguchi, G. Kawai, T. Sawai and K. Ogawa .......................................................... 44

Friction Stir Welding of 7055 Al Alloy
Friction Welding of Aluminum Alloy Applied Positioning Control Process
Takeshi Shinoda, Kazutoshi Ishikawa and Hiroaki Takegami ............................................................... 56

WELDING
Development of Three Dimensional FEM Using Temperature Dependent Interface Element for Predicting Pear-shaped Bead Cracking under Narrow Gap Welding
Masakazu Shibahara, Shinsuke Itoh, Hisashi Serizawa, Hidekazu Murakawa and Terumi Nakamura............................................................................................................................................... 61
Development of Single Side Single Pass Submerged Arc Welding Procedure for C-Mn Steel Plates using Reusable Backing Strip
Rajiv Maiti and N.R. Mandal...................................................................................................................... 69
Implementation of a Non-intrusive and Real-time Weld Quality Monitoring System Using Spectroscopy
Sadek C. A. Alfaro, Guilherme C. Carvalho and Marcelo S. Matos ........................................................... 76
Development of High-Performance Steel Plates with Excellent Weldability
Ki-Bong Kang ........................................................................................................................................... 81
The Evolution of Yb Fibre Laser/MAG Hybrid Processing for Welding of Pipelines
David S. Howse, Robert J. Scudamore and Geoff S. Booth..................................................................... 90
Use of PE-GTAW to Control Microstructure in Duplex Stainless Steels
Nathan Ames, Christopher Frye and Knut Larsen ..................................................................................... 96
Inclusion Utilization Technology in Welding
Yu-ichi KOMIZO and Taiji NISHIZAWA ................................................................................................. 102
Laser Plus GMAW Hybrid Welding of Titanium
Paul E. Denney, Brandon W. Shinn, and P. Mike Fallara ........................................................................ 106
Parameter Characterization of Mechanically-Controlled Pulsed-Short Circuit Gmaw
Nick Kapustka, Cameron Boyd, Chris Conrardy and Nate Ames ............................................................ 112
Evolution of Residual Stresses in Welding of Supermartensitic 13% Cr Stainless Steels
Odd M. Akselsen, Ragnhild Aune, Vigdis Olden and Gisle Rørvik ................................................................ 115

STEEL, FABRICATION AND NDE
Effects of Cooling on the Microstructure and Mechanical Properties of B-added Low Carbon HSLA Steels
Development of API 2W Gr. 50/60 Class TMCP Steel Plates for Offshore Structures
In-Shik Suh, Sang-Ho Kim, Hyun-Uk Hong, Ki-Bong Kang and Fabian Orth ............................................. 129
Microstructural Characteristics of Acicular Ferrite in Linepipe Steels
Y.M. Kim, H. Lee, J.Y. Yoo and N.J. Kim ................................................................................................. 135
Effects of H2S Partial Pressure and pH of Test Solution on the Hydrogen Induced Cracking of Linepipe Steels
Wan Keun Kim, Seong Ung Koh, Kyoo Young Kim, Boo Young Yang and Ki Bong Kang.............. 143
Ni-Al Intermetallic Compound Coating on 304 Austenitic Stainless Steel Using Combustion Synthesis
Akira Okamoto, Nobuhiro Ueda, Kei Demizu and Takumi Sone, Akira Ikenaga and Yukio Hirose

Development of Prediction Model for Precipitates Kinetics and Austenite Grain Growth in the Weld Heat Affected Zone
Joonoh Moon, Jonggeun Ryu, Changhee Lee, Youngho Ahn and Jongbong Lee

A Study on the Metallurgical and Mechanical Characteristics of the Weld Joint of X80 Steel
Choong-Myeong Kim, Jong-Bong Lee and Jang-Yong Yoo

The Reliability Evaluation for CO₂ Laser Welded Joint of 2.25Cr-1Mo Steel
Hee Seon Bang, Young Pyo Kim, Sung Min Joo, Chong In Oh and Han Sur Bang

Fracture, Fatigue and Stress Corrosion Performance of Vacuum Insulated Tubing Weldment
Dong S. Kim and Paul Cernocky

Strain Capacity of Line Pipe with Yield Point Elongation
E. Tsuru, Y. Shinohara, H. Asahi and Y. Terada

Fatigue Behavior of Electric Resistance Welded Seams in API-X70 Steel
H. U. Hong, C. M. Kim and J. B. Lee

Prediction of Plate Deformation Considering Film Boiling in Water Cooling Process after Line Heating
Chang Doo Jang, Jung Su Kim, Yun Sok Ha and Young Hwa Lee

Fatigue Crack Growth and Fracture Toughness Behavior of RAFs by Using TIG Welding
H.K. Yoon, D.H. Kim, S.W. Kim and A. Kohyama

Residual Stress Measurement of Hydroxyapatite Sintered by SPS Processing Method
Keiichiro Yagi, Masahide Gotoh, Toshiyuki Ikoma, Yujiro Watanabe Yukio Hirose and Jyunzo Tanaka

Nondestructive Evaluation of Mechanical Properties Using Instrumented Indentation Techniques: Strength, Fracture Toughness, and Residual Stress
Sung-Hoon Kim, Jung-Suk Lee, Yun-Hee Lee, Kwang-Ho Kim, Yeol Choi and Dongil Kwon

Residual Stress Generated by Grinding of Fine Grain Rolling Steel
Zhijian Huang, Masahide Gotoh, Masayuki Shozu and Yukio Hirose

A Fundamental Study on Residual Stress Measurement of Thin Film Materials Using Synchrotron Radiation
Masahide Gotoh, Shigeki Takago, Toshihiko Sasaki, Yasuo Yoshioka and Yukio Hirose

Development of an Expert System for Successful Welding Duplex Stainless Steels
Huei-Sen Wang

Prediction Method for Welding Deformation of Curved Block by Equivalent Loading Method
Kyoung Bok Jang, Jung Goo Park, Si Hoon Cho and Tae Won Jang

Analysis of Spot and Line Heating Method for Correcting Thin Plate Deformation
Jung Goo Park, Kyoung Bok Jang, Si Hoon Cho and Tae Won Jang
TUBULAR STRUCTURES

ADVANCES IN TUBULAR STRUCTURES

New API Fatigue Provisions
Peter W. Marshall ................................................................. 248

Tubular versus Non-Tubular Hot Spot Stress Methods
Peter W. Marshall and Jaap Wardenier ................................ 254

Status of IIW Static Design Recommendations for Welded Tubular Joints
Xiao-Ling Zhao ........................................................................ 264

Recent Research on Tubular Joints with Very Thick-walled Chords
Y. S. Choo and X. D. Qian .......................................................... 272

STATIC

Ultimate Strength Formulation for Axially Loaded CHS Uniplanar T-Joints
G.J. van der Vegte and Y. Makino ............................................. 279

Structural Characteristics of Offshore Damaged Tubulars
Sang-Rai Cho ............................................................................. 287

Ultimate Strength Analysis of Dented Tubular Members
Tae Byung Chun and In Sik Nho ................................................... 293

Design Recommendations for RHS K-Joints with 100% Overlap
Y. Chen, D. K. Liu and J. Wardenier .......................................... 300

Design Recommendations for RHS-K Joints with 50% Overlap
D.K. Liu, Y. Chen and J. Wardenier .......................................... 308

Shear Stiffness and Maximum Shear Stress of Tubular Members
P.C.J. Hoogenboom and R. Spaan ............................................. 316

FATIGUE

Cyclic Performance of Completely Overlapped Tubular Joints
Wie Min Gho and Ye Yang ......................................................... 320

Thickness Effect in Welded Joints-A Review
Fidelis R. Mashiri and Xiao-Ling Zhao ...................................... 325

Development and Validation of a 3-D Fracture Mechanics Model for Thick-walled CHS T-joints
M. Oomens, A. Romeijn, J. Wardenier and O.D. Dijkstra .......... 333

A Study on the Fatigue Crack in Large-Scale Tubular Joints for Offshore Structures
Sung-Woo Im, In-Hwa Chang, Kwan-Kyu Park, Chul-Hee Jo and Ku-Youn Kim ........................................ 341
MECHANICS, RELIABILITY, RISK AND SAFETY

MECHANICS AND MEASUREMENTS

An Alternative Fatigue Assessment Methodology Using Damage Mechanics Approach

Dynamic Buckling of Cracked Beams Subject to Axial Impacting
W.Y. Tang, Y.S. He, S.K. Zhang and M. Yuan ...................................................................................354

Estimation of Surface Crack Depth Based on Measurement of Crack Opening Deformation
Jingxia Yue, Yukio Fujimoto and Taufiq A. Setyanto ........................................................................360

Strain Measurement in Small Region by the Use of Tack-like Electrode on Piezoelectric Element
Gang Liu, Yukio Fujimoto and Taufiq Arif Setyanto .........................................................................368

RELIABILITY, RISK AND SAFETY

Review of Safety Assessment Methodologies in Marine Systems
Jong-Kap Lee, Beom-Jin Park, Soon-Sub Lee and Dong-Kon Lee ......................................................374

Comparison of '100-Year' Response Values from the Design Wave Technique with Those from the Time-Domain Probabilistic Technique
G. Najafian ...........................................................................................................................................381

Uncertainty Effects on an Offshore Structure Subjected to Wave and Seismic Forces
Kenji KAWANO and Yukinobu KIMURA .........................................................................................391

Reliability Calculation of RC Offshore Structures Under Extreme Wave Loading
H. Karadeniz .........................................................................................................................................399

Assessment of Reliability of Offshore Marine Hydraulic Structures under Seismic Impacts
O.M. Finagenov and V.B. Glagovsky .................................................................................................407

Fuzzy Nonlinear Dynamics of Structural Systems Under Explosion Loads
Hari B. Kanegaonkar .........................................................................................................................413

Structural Damage Alarming by Novelty Detection Technique Based on Modal Flexibility
Zong-guang SUN ...............................................................................................................................419

Development of Health Monitoring System for Ocean Offshore Platform with Fiber Bragg Grating Sensors
Liang Ren, Hong-Nan Li, Jing Zhou, Dong-sheng Li and Li Sun ......................................................424

Measuring Fractal Nature of Heart Rate Variability and Task loads for Establishing Navigation Support System
Nobuyoshi Fukuchi and Takeshi Shinoda .........................................................................................429

COMPOSITES AND SMART STRUCTURES

The Effect of Surface Ply Stiffness on the Energy Absorption of Curved Carbon Fibre Composites
Opukuro S David-West, David H Nash and William M Banks.........................................................435
Reliability and Durability of Polymer Matrix Composites Used in Renewal of Offshore and Polar Structures
Vistasp M. Karbhari ......................................................................................................................441

Effects of SiO₂ Additives on Fabrication Properties of LPS-SiC Ceramics

Design and Analysis of a PVC Seawall System for Waterfront Protection
Uday K. Vaidya, Adolfo A. Villalobos, Juan C. Serrano-Perez and Piyush K. Dutta .......................454

Using Smart Coatings in Offshore Structures
H.G. Wheat and G. Liu ..................................................................................................................463

The Strength of Concrete Filled CFRP-Steel Tubes under Axial Compression
Yinghua ZHAO, Wei Gu, Jin XU and Hongtao Zhang ..................................................................466

Reinforced Concrete Model for Low Reinforcement Ratios
P.C.J. Hoogenboom, A. Scarpas and W. Voskamp ........................................................................471

Physical and Mechanical Characteristics of Polyurethane Foam Insulators Blown by HFC
Yeongbeom Lee, Sunghee Choi, Kunhyung Choe and Sangbum Kim ...........................................477

Effect of Sulfates On the Physical Properties of Portland Cement Mortars
Mustafa Tuncan, Kadir Kilinç, Mehmet Uyan and Ömer Ariöz ....................................................482

Effect of Sulfates On Strength of Portland Cement Mortars
Kadir Kilinç, Mehmet Uyan and Ömer Ariöz ................................................................................489

Dynamic Analysis of Anisotropic Circular Plates Considering the Effect of Shear
Deformation - Analysis of Natural Frequencies and Modes
Hiroshi GOTO, Masahide GOTOH, Ken-ichi HIRASHIMA and Yukio HIROSE .............................494

Low-Velocity Impact Response of Carbon/Epoxy Laminates Subjected to Temperature and
Moisture Conditioning
Mahesh V. Hosur, Kunal Jain and Shaik Jeelani ...........................................................................503

Shock Attenuation in Graded Materials
Piyush K. Dutta and Beverly DiPaolo ...........................................................................................509

Optimization of FRP Top-Hat Stiffened Single Skin and Monocoque Sandwich Plates
Using Genetic Algorithm
K. Maneepan, H.K. Jeong and R.A. Shenoi ...................................................................................513

Examination of Experimental Determination of Stress Intensity Factor for Wood by
Caustics Method
Toshiya Mori, Masayuki Shozu and Hajime Hirose ......................................................................519

Elastic Properties of Composite Material with Anisotropic Ellipsoidal Inhomogeneities
Keiichiro Yagi, Lei Che, Masayuki Shozu and Hajime Hirose .......................................................524

BIOMECHANICS AND CONTROL

Development of a Mechanical Fish That Is Capable of Forward, Up-and-down, and
Turning Motions
Toichi Fukasawa and Ryuji Kobayashi ..........................................................................................530
Tracking Control for a Biomimetic Autonomous Underwater Vehicle Using Pectoral and Caudal Fins
Jenhwa Guo, Chung-Hsin Wu, Forng-Chen Chiu and Sen-Weng Cheng ........................................536

A Numerical Study on Unsteady Flow Around a Mechanical Pectoral Fin
Hiroyoshi Suzuki and Naomi Kato ..................................................................................................544

Robotfish-based Underwater Mobile Sensor Networks for Environmental Monitoring
Zhizhong Shen, Shuo Wang, Min Tan, Zhiqiang Cao and Long Wang ........................................551

Biology-Inspired Precision Maneuvering of Underwater Vehicles (Part 4)
Yoshito Ando, Toshihide Shigetomi and Naomi Kato .....................................................................557

Analysis and Modeling of Fish Swimming Locomotion Mechanism based on Image Sequences
Chun-zhao Guo and Zeng-fu Wang ..................................................................................................565

A Study on Accelerated Motion and Circling Movement of Fish Based on Image Analysis
Satoru Yamaguchi and Masashi Terada ............................................................................................571

SUPERCONDUCTING AND SHIP PROPULSION

Superconducting MHD Helical Channel Experimental Ship “HEMS-1”
Yan Peng, Ciwen Sha, Kuo Zhou, Aihua Yang and Aiwu Peng .....................................................576

On the Research and Development of Super Eco-Ship Project
Yoshimasa Minami and Yasutaka Kawanami ................................................................................583

Identification of Propeller Singing Phenomenon through Vibration Analysis of Propeller Blade

The Influence of Propeller/Hull Interaction on Propeller Induced Cavitating Pressure
Sing-Kwan Lee and Hamn-Ching Chen ............................................................................................596

WAVE IMPACT, IMPACT AND COLLISION

IMPACT, COLLISION AND DAMAGE

Numerical Study on the Effect of Buffer Bow Structure in Ship–Ship Collision
Yasuhiro Yamada, Hisayoshi Endo and Preben Terndrup Pedersen .............................................604

A Numerical Simulation of Stress Loosening of a Bolt Connection under the Impact Load
Tadashi Shibue and Masato Yamamoto ............................................................................................612

Collision Analysis Using Analytical Approach
S. M. Han, H. Ito and Y. S. Suh .........................................................................................................618

Impact Analysis of Greater Plutonio FPSO Considering Ship Collision
MinHan Oh, JaeHyun Kim, YoungSik Jang and Ernie Bird .............................................................626

Research on Crashworthiness of Y-Shape Side Structure Design for FPSO
Zhiqiang Hu, Yongning Gu and Zhen Gao .....................................................................................634
Experimental Study on Behavior of Container on Apron due to Tsunami and Its Impact Load  
Norimi Mizutani, Satoshi Yamaguchi, Takashi Tomita and Shogo Miyajima ........................................... 640

Numerical Analysis of Wave Impact on Ships with Deck Wetness Using a Particle Method  
Seiichi Koshizuka and Kazuya Shibata ........................................................................................................ 646

Wave Slamming on Vertical Surface-Piercing Cylinders: the Role of Nonlinear Wave Scattering  
Rizwan Sheikh and Chris Swan ...................................................................................................................... 652

Breaking Wave Impinging and Greenwater on a Two-Dimensional Offshore Structure  
Yonguk Ryu and Kuang-An Chang ................................................................................................................. 660

The Effect of a Bow Flare Shape on the Water Impact Pressure  
Yoshitaka Ogawa, Ryoju Matsunami and Makoto Arai .............................................................................. 666

3-D Numerical Simulation of Freely Moving Floating Body by CIP Method  
Changhong Hu, Odd Faltinsen and Masashi Kashiwagi .............................................................................. 674

A Study for Whipping Analysis of Ships in Irregular Wave Condition  
Seong-Whan Park, Il-Hyoung Cho and Chae-Whan Rim ............................................................................ 680

Image Analysis of Wave Collapse Phenomenon near the Bow of Small High-Speed Craft  
Seung-Jin Shin, Satoru Yamaguchi and Akiji Shinkai .................................................................................. 687

Rational Polynomial Approximation of Actively Controlled Structures Based on Analytically Determined Model  
S. B. Kim, B.F. Spencer, Jr. and C.-B. Yun ...................................................................................................... 693

ADVANCED TANKERS, CAD AND CONSTRUCTION

TANKERS: Design & Construction

Challenging Port Deadweight Limitations for Newly Designed Crude Oil and Product Carriers  
Abobakr M. Radwan ...................................................................................................................................... 697

Time-variant Corrosion Degradation, Hull Girder Strength and Fatigue Assessment for Ageing Double Hull Tankers  
Duo Ok and Yongchang Pu ........................................................................................................................... 703

A Study on Optimum Size of Big Bracket in Cargo Tanks of Crude Oil Carrier  
Sang-Hoon Shin, Ick-Hung Choe, Jong-Hwan Lee, Doehyun Kim and Jin-Chil Kwon ................................. 711

Optimized Design of Hull Form and Bulbous Bow for ULCS  
K.J Lee and E.S Sarath ................................................................................................................................... 715

SHIP STRUCTURAL MECHANICS, SHIP CAD AND FAST SHIPS

Least Construction Cost of FSO Offshore Structures and LNG Gas Carriers  
Philippe Rigo, Jérôme Matagne, Catalin Toderan and Jean-David Caprace .................................................. 722

Optimum Grillage Structure Design under a Worst Point Load using Real-coded Micro-Genetic Algorithm  
Y. Kim, K. Gotoh, K.S. Kim and M. Toyosada .............................................................................................. 730
Probabilistic Assessment of Ultimate Hull Girder Strength in Longitudinal
Hiroshi Kawabe, Hajime Ohtani, Yoshitaka Maeno, Yasunari Fujii, Kazuhiro Iijima and
Tetsuya Yao..........................................................................................................................737

Estimation of Buckling and Ultimate Strength of a Stiffened Web Plating with Cutout
Minoru Harada and Masahiko Fujikubo..............................................................................745

ANN-Based Response Surface Method and Its Application To Ultimate Strength of Plates
Yongchang Pu, Ehsan Mesbahi and Ahmed H. ElHewy.......................................................752

Compressive Tests on Stocky Panels with Different Configurations
José Manuel Gordo and Carlos Guedes Soares.................................................................759

Application of Idealized Structural Unit Method to Progressive Collapse Analysis of Ship’s
Hull Girder under Longitudinal Bending
Zhiyong Pei and Masahiko Fujikubo..................................................................................766

Spatial Block Arrangement Scheduling in Shipbuilding Industry Using Genetic Algorithm
for Obtaining Solution for Anticipated Bottleneck
Ranjan Varghese and Duck Young Yoon..........................................................................774

Ship Hull Representation with a Single NURBS Surface
Conghong Lu, Yan Lin, Zhuoshang Ji and Ming Chen......................................................780

Optimized SWATH Form Design with High Speed and Seakeeping Performance
Tieli Li, Yan Lin and Zhoushang Ji.....................................................................................785
