The Proceedings of
The Fifth (2003) ISOPE
OCEAN MINING SYMPOSIUM

Tsukuba, Japan
2003

Exploration and Survey, Environment, Mining Systems and Technology,
Processing Technology, Deep-Ocean Water Upwelling, and Gas Hydrates

ISBN 1-880653-61−3
www.isope.org

How to Use This Table of Contents
Scroll down or use the bookmarks in the left-side frame to move to a new location in this index.
Click on a blue paper title you like to view.
To return to this index after viewing a paper, click on PREVIOUS MENU bookmark in the left-side frame.

This CD-ROM was created from the author-made PDF files, except some 3% of the papers from scanning the
authors’ hard-copy originals. View quality of the text and graphics and the ease of readability depend largely
on the quality and/or consistency of the PDF-making procedure the authors used or the individual author’s hard
copy originals for scan.

Edited by:

Jin S. Chung, ISOPE, Cupertino, California, USA
Tetsuo Yamazaki, National Institute of Advanced Industrial Science and Technology, Tsukuba, Japan
Takeshi Komai, National Institute of Advanced Industrial Science and Technology, Tsukuba, Japan
Koji Otsuka, Osaka Prefecture University, Osaka, Japan

Presented at:

Organized by:
International Organizing Committee, International Society of Offshore and Polar Engineers

Cosponsored by:
International Society of Offshore and Polar Engineers (ISOPE)
Mining and Materials Processing Institute of Japan (MMIJ), Japan
CONTENTS

Foreword .................................................................................................................................... iii
Acknowledgement ..................................................................................................................... iv
Partial List of Reviewers ........................................................................................................ iv
Announcements and Publication Order Information ........................................................... v, vi, vii, viii, ix, x

OPENING SESSION

Opening Address:
Deep-ocean Mining Technology: Learning Curve I (Invited Paper)
   Jin S. Chung ........................................................................................................................................ 1

Introduction of MH21 (Research Consortium for Methane Hydrate Resources in Japan) and
Current Topics in Production Method and Modeling of Methane Hydrate (Invited Paper)
   H. Narita ........................................................................................................................................ 7

EXPLORATION AND SURVEY

Geological Study of Cobalt-rich Ferromanganese Crusts Using a Camera-monitored Drill
Machine in the Marshall Islands Area
   A. Usui, K. Matsumoto, M. Sekimoto and N. Okamoto ................................................................. 12

Metallocenic Region in the Izu-Ogasawara (Bonin) Arc, Northwestern Pacific
   K. Iizasa ........................................................................................................................................ 16

Effect of Phosphatization on Element Concentration of Cobalt-Rich Crusts
   J. Pan, E. Decarlo, and S. Liu ........................................................................................................ 20

PGE-bearing and Other Accessory Minerals in Hydrogenous Ferromanganese Crusts: Placer
Mechanism of Accumulation
   M. P. Torokhov and L. I. Anikeeva .............................................................................................. 27
# DEEP-OCEAN WATER UPWELLING

**A Preliminary Study on Air-Lift Artificial Upwelling Induced by Air-Bubble Screen**  
*N.-K. Liang and H.-K. Peng* .................................................................31

**Ocean Nutrient Enhancer “TAKUMI” for the Experiment of Fishing Ground Creation**  
*K. Ouchi* ........................................................................................................37

**Research Plan for Assessment of the Effectiveness of Fertilizing Sea Area by Utilizing Deep Ocean Waters - A Trial in the Project for the Development of Fishing Grounds by Applying Deep Ocean Water**  
*S. Kanamaki, Y. Uemura, H. Ohmura, T. Suzuki, Y. Honda, Y. Oshima and I. Yasuda* .................43

**Concept for a Wave Driven Mechanical Artificial Upwelling Device (N.A.U.D.)**  
*R. Handschuh, G. Schneider and E. S. Schulte* .................................................48

---

# MINING TECHNOLOGY AND SYSTEMS

**The Path to Commercialisation; Mining Seafloor Massive Sulphides**  
*C. J. Rees, B. K. Hebblewhite and D. Laurence* ..................................................57

**A Case Study of Mining Seafloor Massive Sulfides in Japanese EEZ**  
*T. Yamazaki, S.-H. Park, S. Shimada, K. Iizasa and S. Shiokawa* ........................................63

**Economic Simulations of a Small Scale Manganese Nodule Mining System Taking into Account New Technologies**  
*R. Handschuh, E. Schulte, H. Grebe and W. Schwarz* ................................................71

**Behavior of Deep Sea Mining Pipe and its Effect on Internal Flow**  

**A New Method Using Euler Parameters for 3D Nonlinear Analysis of Marine Risers/Pipelines**  
*S. Hong, H.-W. Kim and J.-S. Choi* ........................................................................83

**Effects of Internal Flow on Dynamics of Underwater Flexible Pipes**  
*S. Hong, J.-S. Choi and H.-W. Kim* ...........................................................................91

**Direct Current Power Supply for Deep-sea Mining Machine**  
*J. Janoušek, P. Tušla, P. Voženilek and K. Buhr* ......................................................99

**Virtual Reality Research of Ocean Poly-metallic Nodule Mining Based on COMRA’s Mining System**  
*S. Liu, G. Wang, L. Li, Z. Wang and Y. Xu* .........................................................104
Dynamic Simulation of COMRA's Self-Propelled Vehicle for Deep Ocean Mining System
Z. Wang, S. Liu, L. Li, B. Yuan and G. Wang.................................................................112

Several Considerations of the Design of the Hydraulic Pick-Up Device
N. Yang and H. Tang........................................................................................................119

Transferability of Soil Mechanical Parameters to Traction Potential Calculation of a Tracked Vehicle
E. Schulte, R. Handschuh and W. Schwarz.................................................................123

Comparative Study on Tracked Vehicle Dynamics on Soft Soil: Single-Body Dynamics vs. Multi-Body Dynamics
H.-W. Kim, S. Hong and J.-S. Choi..............................................................................132

An Experimental Study on Tractive Performance of Tracked Vehicle on Cohesive Soft Soil
J.-S. Choi, S. Hong, H.-W. Kim and T.-H. Lee..............................................................139

Prediction of the Motion of Tracked Vehicle on Soft Soil Using Kriging Metamodel

GAS HYDRATES

Macro and Micro Approaches: Hydrate Phase Equilibria (Invited Paper)
H. Lee..........................................................................................................................150

Static Shear Behaviors of Methane Hydrate and Ice
Y. Nabeshima and T. Matsui........................................................................................156

Applicability of Cubic Equations of State and Their Mixing Rules to the Prediction of Decomposition Condition of Methane Hydrates

Numerical Modeling of Decomposition of Methane Hydrate in Water Flow
W.-Y. Sean, T. Sato, A. Yamazaki and F. Kiyono......................................................165

Properties of Multiphase Flow in Marine Sediments with Gas Hydrate
Y. Sakamoto, T. Komai, Y. Kawabe and T. Yamaguchi.............................................171

Numerical Study on Recovery System of Methane Hydrate
R. Hamaguchi, H. Yahashi, M. Minemoto, Y. Matsukuma, N. Kamishima, K. Arikawa and M. Watabe.................................................................176

Dissociation Behavior of Methane Gas Hydrate in Ethylene Glycol and Silicone Oil
Experimental Research on the Formation and Storage of the Methane Gas Hydrate
   Y. Kobayashi........................................................................................................................................185

ENVIRONMENT

Marine Environment in the IOM Area (Clarion-Clipperton Region, Subtropical Pacific): Current Knowledge and Future Needs
   T. Radziejewska, K. Szamalek and R. Kotliński..................................................................................188

Collection of Marine Data for Visualisation of Seafloor Mining Sites
   J. E. Holden, P. M. Stothard and D. Laurence..................................................................................194

Summary of “Environmental Impact Research on Marine Ecosystem for Deep-sea Mining” Conducted by Metal Mining Agency of Japan
   S. Ohkubo and T. Yamazaki..............................................................................................................200

Monitoring Effects of Simulated Disturbance at INDEX Site: Current Status and Future Activities
   B. S. Ingole, C. Raghukumar, P. A. Lokabharati, S. G. P. Matondkar, V. R. Babu, V. S. N. Murty, 
   M. T. Babu and A. Sardar..................................................................................................................208

Calculation of Suspended Solids Dispersion in the Sea Environment
   B. Arkhipov, V. Koterov, A. Kocherova, V. Solbakov, D. Shapochkin, G. Khublaryan,
   G. Belousova and V. Evdokimov.......................................................................................................216

PROCESSING TECHNOLOGY

An Integration with Non-Metallurgical Industries — New Challenge for Polymetallic Nodules Processing?
   F. Vranka................................................................................................................................................223

Dissolution Studies on Cu-Ni-Co-Fe Matte Obtained from Manganese Nodules
   S. Si, S. Anand, C.-W. Nam, K.-H. Park and R. P. Das.......................................................................231
